FAQ

1. Please put the phone/airPods/Watch at the center of charging area.
2. To achieve the fast charging, Please use a chargers supporting QC18W/PP20W or higher to supply power to the wireless charger.
3. The charging distance is 0-2mm, please do not use a protective case thicker than 2mm.
(Magnetic and metal attachments or credit cards will influence the charging stability, please remove them before charging).
4. The watch has temperature control feature, when the temperature reaches 45°C, device will stop charging automatically. If the temperature become normal, it will continue to charge.
5. The lower the temperature, the faster the charging speed. The charging speed is faster in winter than in summer.
6. Please don't charge in high temperature and humid environments to avoid damage of circuit.
7. Keep out of reach of children to avoid unnecessary accidents.
8. Please place the charger away from flammable and explosive liquids or gases.
9. If you have any problems on this wireless charger, please feel free to contact the seller service, we will offer you a best solution within 24 hours. Your safety and experience is our top priority, we offer it all covered.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
