INTRODUCTION

Frequency matching process: First, randomly select a remote controller and power on any car until the indicator light changes from fast flashing to slow flashing or remains constantly lit, indicating successful frequency matching between remote controller A and car A. Then, repeat this process to power on car B with remote controller B for frequency matching. This completes the frequency-matching process for a pair of remote control cars.

Remote Control Battery Compartment

Use 2X1.5V "AA" Batteries (Not Included)

Car Charging Instructions

Connect to 5V USB devices for charging

1. The charging time is approximately 60 minutes, with the indicator light on when charging and off when full.
2. It is normal for the battery pack to heat up slightly when charging.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
