1.Warnings:

1.1 Ensure strong 4G cellular signal in your area.

1.2 Confirm the walkie-talkie has an SIM card installed

1.3 A pre-configured SIM card is included with your device. Do not use this SIM card in other devices to avoid activation locks.

1.4 For technical issues, contact your seller or customer service.

2.Key Features

2.1Group Call:

Like traditional two-way radios, your voice is broadcast to all members in the selected group (channel).

2.2Private Call:

Select a user within your group to initiate a private conversation. Exiting the call returns both parties to the original group. (Screen-equipped models only.)

2.3 Custom Group Names

Default groups are named after the purchaser. To rename groups or add new ones, just to contact customer support.

2.4 Priority Talkover

Example: In a 10-device group, Device #1 can override others when multiple users press the PTT button simultaneously.

2.5 Mute Group Members

Example: Device #1 can mute all users in a group to restrict communication.

2.6 Pair multiple radios

Both radios are preset with default settings before shipping. If you purchase more radios, please send us the account number on the card and we will create a new group to allow you to pair multiple radios.

2.7 Custom Features

For features 2.3 – 2.6, contact your seller for setup.

3.Troubleshooting

3.1 No internet Connection:

Step 1: Confirm the SIM card is installed and the antenna is attached.

Step 2: Wait 1 – 2 minutes after powering on for network registration.

3.2 Account Does Not Exist

Contact customer support and provide your device's IMEI number.

(To find IMEI: Menu → Settings → system information → IMEI)

3.3 Not in a Group:

Either no cellular signal (see 3.1) or the device hasn't been added to a group. Contact your seller to join a group.

4.Care & Maintenance

4.1 New batteries may not be fully charged. Drain and recharge fully before first use.

4.2 Keep batteries away from heat, flames, or direct sunlight to avoid damage or hazards.

4.3 Avoid charging in extreme temperatures (<10° C or >45° C).

4.4 Never charge the device without the battery installed.

4.5 Dispose of batteries properly at certified recycling centers.

5. Quick Fixes

Issue	Solution
Device won' t turn on	Charge the battery for 30 minutes.
Weak signal	Check SIM validity and carrier coverage maps.
Call drops	Move to an open area with ≥ 1 bar signal strength.

6. Some words for friends~

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

SAR tests are conducted using standard operating positions according standards with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

This model product has been tested and meets the RF exposure guidelines with the test distance 0mm for body worn. The highest SAR_{1g} value is 0.728 W/Kg. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with RF exposure requirements, and should be avoided
