产品示意图：

The diagram illustrates the YEBOS YEBOS-01 stylus, a sleek, silver-colored device with a black rubberized grip at the bottom. The stylus features a central touch-sensitive area. Labels with leader lines identify the following components: '快捷功能键' (Quick Function Key) pointing to a small circular button on the left side of the touch area; '充电口' (Charging Port) pointing to a small rectangular port on the right side of the touch area; '按键开/关' (Button On/Off) pointing to the same small circular button; and '指示灯' (Indicator Light) pointing to a small circular light on the right side of the touch area. The brand name 'YEBOS' is printed in black on the silver body near the bottom. The model number 'YEBOS-01' is printed in black on the black grip section.

- This product is not a child's toy, please ensure that infants and toddlers do not play with this product as a toy-child under 12 years old, please use under the care of a guardian.
- Operation rate of the capacitor, so as the capacitor battery capacity is not equal to the amount of rechargeable.
- Please charge your capacitor pen regularly (recommended once every 3 months) to maintain long-term service life.
- The product is prohibited from hard bending, heavy pressure: do not collide with sharp or sharp objects when using or storage.
- The product is not waterproof, do not use when the product is wet and dry in time; do not use again after completely soaking water and internal water, to avoid accidents and dangers;
- The product built-in battery, it is prohibited to use and store in high temperature (higher than 40 °C) environmental spaces, such as stove, heater, lamp, exposed or open, etc.: to avoid battery explosion and other accidents;
- Do not dispose, disassemble the battery or cut the battery at high temperature for a long time (above 60 °C), otherwise there may be leakage or explosion risk;
- If the consumer uses the capacitor pen adapter to charge, the power adapter input rated voltage should be within 5V, rated current 2A, and obtain the national mandatory safety certification to use;
- This product uses lithium battery. Overcharge or pass will affect the service life of the product, please charge in time.
- Do not disassemble the power after use.
- Product failure, please contact the sales or the company in time. It is prohibited to disassemble and repair attempts to disassemble or change the structure of the product, so as not to cause unnecessary failure and danger.

The name and content of harmful substances in the product:

The icon indicates "environmental protection effective use period", not the product quality warranty period, electronic products contain lead, mercury, cadmium and other harmful substances, once the expiration of use, toxic and harmful substances may leak or migrate from products to the environment, or causing serious damage to people and property. "Environmental service life limit" means that some products will be prohibited to use within this limited period, beyond the safe life of the safety risk problems, or users are no longer responsible for product quality.

Electronic information products: Toxic and harmful substances declaration:
 The table is compiled according to the GB/T17524 standard.
 0: Indicates that the content of the toxic and harmful substances in all the materials of the parts is below the limit requirements specified in the GB17524 standard.
 X: Indicates that the content of toxic and harmful substances in at least one homogeneous material of the part exceeds the limit requirements specified in GB17524 standard

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

This equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure mode without restriction.
