

TTLOCK

APP Manual

VER.202308

Please read the manual carefully before installation and keep this manual at a secure place.

- Please refer to sales agents and professionals for information not included in this manual.

Introduction

The App is a smart lock management software developed by Hangzhou Sciener Intelligent Control Technology Co., Ltd. It includes door locks, parking locks, safe locks, bicycle locks, and more. The App communicates with the lock via Bluetooth BLE, and can unlock, lock, firmware upgrade, read operation records, etc. The Bluetooth key can also open the door lock through the watch. The app supports Chinese, Traditional Chinese, English, Spanish, Portuguese, Russian, French, and Malay.

Download

APP

The iOS version can be found in the App Store and the Android version can be found in Google Play, App Store, Baidu, Alibaba, 360, Huawei and Xiaomi.

2.Lock management

The App supports multiple types of lock, including door locks, padlocks, safe locks, smart lock cylinders, parking locks, and bicycle locks. When adding a device, you must firstly select the lock type. The lock needs to be added to the app after entering the setting mode. A lock that has not been added will enter the setting mode as long as the lock keyboard is touched. The lock that has been added needs to be deleted on the App first.The added lock will be shown in the lock list, together with lock name and battery level.To add a lock, please wake it up first by touching the keypad, or swiping card.If the lock has been woken up but still not in setting mode, it may has been added by others yet. Please reset it first then try again.

2.1 Lock adding

- (1) Call out menu interface in the upper left corner of the interface;
- (2) Select Add Lock;
- (3) Select the corresponding type of door lock to add it according to the prompt;
- (4) The door lock name has a "+" sign in black to indicate that it can be added.

Note: Before adding, please make sure that your mobile phone's Bluetooth is turned on and the network is turned on, if the network signal is not good, please add an environment with a strong signal and upload data according to the prompts.

Locks that have already been added to the administrator cannot be added, so please remove the administrator or reset the lock after the lock is reset.

5.Work with

Call out the menu interface in the upper left corner of the interface, select value-added services, you can purchase SMS and email; You can also activate the premium version of the function, including SMS template, email template, batch authorization administrator, group key, and batch group function.

Overview of key features

After adding lock, you can grant access permissions to others, including ekey, passcode, fingerprint, face, and etc.

*If your smart lock does not support a function in the APP interface, the function will not be displayed on the APP interface.

① key management

Send ekey

You can see all ekeys here. Press "Reset" at the top right to delete all of them. In the ekey's detail page, you can view, change, freeze, and delete it. Click "Send eKey" to send ekey to someone else. If the recipient account hasn't been registered yet, it will be registered automatically. A SMS message or email with password will be sent

Remote unlock: Gateway is needed to do remote unlock. Identity verification: (It only works in China).

Key management

In the ekey's detail page, you can view, change, freeze, and delete it. You can see all ekeys here. Press "Reset" at the top right to delete all of them.

Deadline warning

System will show two colors for deadline warning. The yellow means close to expiring and the red means it has expired.

② Passcodes

Generate passcode

You can see all passcodes here. Press "Reset" at the top right to delete all of them.

You can also create an "Erase" passcode to delete all other passcodes. Or create a custom passcode.

Erase: When you input "Erase" passcode on lock, all other passcodes will be disabled.

One-time passcode only works within 6 hours.

The passcodes with type permanent, timed, and recurring should be used at least once after their "start time". Or they will be invalidated.

Password management

In the passcode's detail page, you can view, change, share, and delete it.

Only passcodes have been used on lock can be changed.

③ Fingerprint

Fingerprint management is similar to IC card management. After adding a fingerprint, you can use the fingerprint to unlock the door.

④ Face

- All faces of this lock will be listed here. Click "Reset" at the top right delete all of them. Click "Sensitivity" to set the sensitivity of the camera on the lock.
- In the face's detail page, you can view, change, and delete it.

FCC Warning Statement:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and (2) this device must accept any interference received,
- (2) including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co - located for operating in conjunction with any other antenna or transmitter.

- There are two ways to add a face.
- Select the type, enter the name, and select "From lock" as the add method. Follow the prompts to align the face with the lock's camera.

- Select "From photo" as the add method. Select a photo that meets the requirements and preview the effect. If you are not satisfied, you can "Replace". Click "OK" to complete the addition.

⑤ Palm vein

- You can see the palm vein that has been added here. There are "Reset" and "Sensitivity" in the menu. Click "Reset" to delete all palm vein data; click "Sensitivity" to adjust the camera's recognition sensitivity.
- You can enter the palm vein details page from the list to view, modify, and delete.
- Select the type, enter the name, follow the prompts to align your palm with the lock's camera, and record the palm vein.

⑥ QR code

QR code lock unlocking

All the generated QR codes will be listed here.

In the QR code's detail page, you can view, change, share, and delete it.

Selete validity period type and enter the name to create a QR code. The QR code link can be send to others via SMS, email, and etc.

⑦ Remote

All remote control of this lock will be listed here. Click "Reset" at the top right to delete all of them.

In the remote control's detail page, you can view, change, and delete it.

Selete validity period type and enter the name, then make the device into setting mode and add it with app.

⑧ Authorized Admin

There are three user levels: administrator, authorized administrator, and user. When you add a lock with App, you will be the administrator of this lock. The administrator can add others as the authorized administrators. Both the administrator and authorized administrator can grant access permission to others. Users have the permission to unlock with App.

First, select a lock and run into the console page.

Click "Authorized admin", you can see all current authorized administrators of this lock.

Click "Create admin", enter the account and validity period, then click "Send".

The authorized administrator has almost the same permission as the administrator, except for some special functions.

⑨ Records

Look up all operations in the "Records" page. You can delete or export the records.

The administrator can clear all the records.

Click "Export records" at the top right menu. You can export the records of last half year.

The administrator can query the unlock record of each key.
