1. PRODUCT OVERVIEW

SIRIUS series products are easy-to-use, accurate and durable thermal scopes. This series focuses on core functions through minimalist design, making the product easier to use and providing you with value for money. SIRIUS's different heights and 4 direction buttons and intuitive UI make device setting simple and fast. Even wearing gloves in the dark, you can easily identify buttons and operating scopes. Considering the bad weather that may occur in hunting scenes, it is equipped with a high-performance sensor, ultra-large basic magnification to escort the hunting experience of customers in rain/fog/sunny days. Regarding power consumption, the 18650 replaceable battery allows you not to worry about the end of outdoor activities, and the fun is sustainable. In addition, there are RAV functions, PIP functions, waiting for you to experience them in all aspects.

2. PRODUCT FEATURES

8. POWER ON / OFF

Power On / Starting

The device is in shutdown state:

Press and hold the POWER button for 3 seconds to turn on scope. The VUE logo will appear.

Powering Off / Stopping

The device is in power-on state:

Press and hold the POWER button, the power-off screen will open, start counting, shut down after 3s.

Tips: If you release the POWER button within 3 seconds, the shutdown process will stop and it will return to the main interface.

9. MAIN INTERFACE

Status Bar

The status bar is in the upper left corner of the main interface. The icons correspond to the following functions:

1. Environment mode: Sun/Fog.
2. Digital zoom: 1× 2× 4×.
3. Wi-Fi: On/Off.
4. Current zeroing profile : A/B/C/D/E.

Time And Battery

The time and battery information are displayed in the upper right corner of the main interface.

1. Real-time time.
2. Battery level: The 4 power levels are 10%, 40%, 70%, and 100%. The USB charging status icon is displayed when charging.

10. SHORTCUT FUNCTION

Digital Zoom

On the main interface, press the UP button to zoom image. The magnification factors are 1X, 2X, and 4X. The top status bar is updated in real time.

PIP

On the main interface, press and hold the UP button to enable the PIP function. When the PIP function is turned on, the PIP displayed in the upper center of the screen, the small dot in the center indicates the center position of the reticle. At this time, press the UP button to switch the PIP magnification. The original image will maintain a x1 magnification.

Image Correction

On the main interface, press the LEFT button to perform an image correction. This is usually used when the image effect is poor.

Environment Mode Switching

On the main interface, press and hold the LEFT button to switch environment mode between sun and fog.

Image Pattern Switching

On the main interface, press the RIGHT button to switch the image pattern, including white hot, black hot, red hot, color, red monochrome.

Recording

On the main interface, press the DOWN button to start recording, the timer will be displayed at the top of the screen, with a time format of MM:SS (minute: second). If the memory is full, an exclamation mark will appear at the top of the screen, and a text prompt will appear below. Press the DOWN button again to stop and save the recording.

Photographing

On the main interface, press and hold the DOWN button to take a photo.

11. SHORTCUT MENU

On the main interface, press the MENU button to open the shortcut menu. Short press the UP, DOWN, LEFT, and RIGHT buttons to adjust the specific parameters of the menu function.

Press and hold the MENU button or press the POWER button to save the changes and return to the main interface. If there is no operation for 5 seconds, the shortcut menu will automatically exit. Any changes in the shortcut menu will be saved when exiting, including shutdown operation.

Contrast Setting

On the shortcut menu interface, press the UP button to switch contrast, with a range of 1-5.

Screen Brightness Setting

On the shortcut menu interface, press the DOWN button to switch screen brightness, with a range of 1-5.

Reticle Color Setting

On the shortcut menu interface, press the LEFT button to switch reticle color, and choose from white, black, red, and green.

FCC Statement

FCC ID: 2BKD5-SRUS-03

Labeling Requirements

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Information To The User

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

EMC Class A

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

To comply with RF exposure requirements, a minimum separation distance of 0.00 cm must be maintained between the user's body and the handset, including the antenna.
