

Warranty card

Thank you for purchasing this mobile power bank product!

- We will provide warranty service after confirming your purchase voucher according to the warranty terms. Please keep this warranty card safe.
- Please present your purchase warranty card when applying for repairs.
- In order for you to receive timely technical support services, please contact the dealer of the product you purchased first when encountering a malfunction, and we will provide a unified warranty.

Please fill in the following information truthfully

Customer Name :	
Contact number :	
Purchase date :	
Product model :	
Problem description:	
Platform store name:	
Order number :	

Be careful:

- 1.If you find that the device cannot be charged when using it, please check if the wiring is normal, secure, or if the charging interface accessories are suitable. It is recommended to use a reputable brand power adapter to charge it.
2. Mobile power banks have conversion efficiency, so their capacity is not equivalent to their rechargeable capacity.
3. Mobile power banks are suitable for charging most mobile phones, but some models may not support charging. In this case, this product is not covered by replacement or warranty.

Mobile Power Profiles

Thank you for purchasing and using this product!
To ensure a better operating experience for your mobile phone or electronic product, please also refer to the manual of your mobile phone or electronic product while reading this manual.

Accessories List: Portable Power Bank*1 Manual*1

Due to different accessory requirements in each region, the above accessories may vary. If you have any questions, please contact our online customer service.

Manufacturer: Shenzhen Baojiecheng Technology Co., Ltd

Address: 802, Ronghe Building, Bantian Street, Longgang District, Shenzhen

Before using the portable power bank, be sure to carefully read the "User Manual" and "Precautions for Use"

1. Do not drop, touch, disassemble or puncture on your own, and do not expose to high temperatures in fire or water.
2. If any other adverse phenomena such as swelling are found or if the charged device has swelling or other adverse phenomena, please stop using it.
3. This device is not suitable for individuals with low physiological, perceptual, and mental abilities (including children), nor for those lacking relevant experience and knowledge, unless there is someone specifically responsible for their personal safety to supervise or guide them in using this device. Children should be taken care of to ensure that they do not play with this device as a toy.
4. Mobile power banks should be stored away from flammable and explosive liquids, gases, or explosives to avoid danger; Do not expose the power bank to sunlight and humidity for a long time. Using it in a rainy environment or in such environments with high temperatures may cause the power bank to become naturally damp, while a rainy environment may lead to short circuits.
5. Do not use the power bank in a high-temperature and sealed environment, such as in a backpack or wallet in a car during summer. The temperature inside the wallet is usually very high, and the space is relatively enclosed. Keeping the power bank in a high-temperature and sealed environment is very dangerous.
6. Mobile power banks should avoid short circuits caused by contact with metal materials, especially when placed in pockets and backpacks. Pay attention to small metal objects (such as keys, lighters) that may touch or enter the USB input port, causing a short circuit in the mobile power bank.
7. It is recommended to charge and discharge the power bank infrequently every month to extend its lifespan. If the power bank is not used for a long time, it is best to store it in a state of 50% battery life.

8. If any abnormal conditions such as odor, overheating, discoloration, deformation, or leakage are found, please stop using immediately. If the electrolytic liquid accidentally falls on the skin, immediately rinse it with tap water and seek medical attention promptly. Electrolytes have strong corrosiveness and flammability.

Warning safety information:

Warning: Failure to follow these safety instructions may result in fire, electric shock, damage, or other injury.

- ① If consumers use a power adapter for charging, they should purchase a matching power adapter that has obtained CCC certification and meets the standard requirements;
- ② The product should be placed on a desktop during use. If it needs to be used in contact with the human body, the contact time should be less than 10 seconds;
- ③ Do not use after immersion in water.

Disclaimers

Due to the possibility of product overheating, fire or other accidents caused by misuse, you must strictly follow the user manual when using the product. Our company does not assume any responsibility for any accidents caused by not following the user manual for operation only.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 0 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
