

USER MANUAL

Connecting the Samsung Smart Remote to the TV

Connect the Samsung Smart Remote to your TV to operate the TV.

NOTE: When pairing this remote control, ensure that no other usable remote controls of the same brand are nearby.

How to pair?

- Point the remote control at the receiving window of the TV
- Press and hold the  and  keys for more than 3 seconds until the pairing message appears on the screen. If the pairing information does not appear after pressing for more than 3 seconds, please the  and  keys again for more than 3 seconds. Until the pairing message appears. The pairing is completed only when pairing is successful.

The usage method of solar cells.

- To extend the battery life of solar-powered remote controls, it is recommended to charge for at least 10 minutes every month.

A. Low voltage indication:

When the voltage is lower than 2.4V and any key is pressed, the indicator will flash five times continuously, indicating that the battery is undervoltage. The TYPE-C cable needs to be connected to a 5V charger to charge the remote controller(generally, the remote controller can be charged by mobile phone charger. Charge for more than 10 minutes).

B. Precautions for use:

- Please place the solar cell of the remote controller towards the direction of illumination.
- When the solar battery of the remote controller is under voltage, please charge it immediately for more than 10 minutes, and do not let the solar battery be under voltage for a long time. Otherwise, the service life of the solar cell will be affected.

Warning

To assure continued compliance, any changes or modifications not expressly approved by the party.Responsible for compliance could void the user’s authority to operate this equipment.

FCC Statement

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The device has been evaluated to meet general RF exposure requirement.  
The device can be used in the portable exposure condition without restriction.
