Walkie-talkie	Press the intercom button to send a signal, and click the ring call button to make a ringing call

Electromagnetic Radiation Protection: This device is designed with a safe voltage of 4.5V, and its electromagnetic radiation meets children's safety standards. It is recommended to keep the device at an appropriate distance from the head when in use, avoid prolonged close contact with the ear, to reduce potential radiation exposure risk.

Hearing Protection: The volume setting should be moderate to avoid hearing damage caused by excessively high volume. Children's ear canals are more delicate, and prolonged use may affect hearing health. It is recommended that single-use time does not exceed 30 minutes, and children's usage habits should be supervised.
