1. Devices with built-in quick charge/normal charge wireless receiver.
2. Devices with outer-face wireless charging receiver.
3. Devices with wireless charging receiver in its protection case .

1. The wireless charger is connected to the AC power supply through the power adapter. The wireless charger is turned on, the green light is on, and the standby mode is entered.

2. When the mobile phone or TWS is wirelessly charged, the indicator light is bright blue. When the watch is charged, the indicator light has not changed. (Frequent flashing of green and blue indicators indicates foreign object detection)(Note: If the watch has no electricity, charging will be slower, it is recommended that the watch is close to 10% please charge, when there is no electricity, charging is slower, you may need to wait for 1 hour, you need to have patience)

3. The touch switch of the night light is located on the side of the base. Click the switch, turn on the light, there is three levels of brightness, each gear, long press the switch, the light gradually becomes brighter or darkened.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
