VEHICLE BACKWARD.
PUSH BACKWARD
VEHICLE FORWARD.

2.4G PAIRING MODE:

When the vehicle is loaded with batteries, turn the switch to the ON position, and the roof light flashes.
The remote controller is equipped with a battery. Press the switch for three seconds to turn on the remote controller, and then the red light flashes. After successful frequency alignment, the red light goes out and enters the remote control mode.

BATTERY INSTALLATION

REMOTE CONTROL
USES 2 1.5V AA BATTERIES.

PRECAUTIONS FOR BATTERY USE

- The toy car uses a 7.4V rechargeable battery, and the handheld remote control uses 2 1.5V AA non-rechargeable batteries.
- Non-rechargeable batteries are not rechargeable; rechargeable batteries should be removed from the toy before charging.
- Rechargeable batteries can only be charged under adult supervision.
- How to remove and put the battery: Loosen the screws with a screwdriver, uncover the battery, and put and remove the battery according to the correct polarity.
- The removal and placement of the battery should be carried out according to the logo on the toy battery room.
- Toys cannot be connected to more than the recommended number of power supplies.
- Only use the same or the same battery as the recommended battery.
- Do not mix old and new or different types of batteries.
- The battery should be placed in the correct polarity.
- The exhausted battery should be removed from the toy.
- The power terminal should not be shorted.
- The cable must be charged and its wires, plugs, housings and other components must be checked regularly for damage. When damage is found, it should be stopped until it is repaired.

WARNING

- Contains small parts and small balls, which may cause a risk of suffocation and discomfort. Suitable for children under three years old to avoid the risk of suffocation!
- When in use, an adult must be present for supervision and guidance.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
