5. Add a name and choose an emoji for your item. The setup process is done.
6. Your item is now connected and ready to help you locate your item.

Find My Functions

05

Enable "Lost Mode"

- Open the Find My app.
- Select the "Items" tab or use Find Items app on Apple Watch.
- Tap on your car charger name in the list.
- Under "Lost Mode", tap "Enable" and follow the prompts.

Remove the item from Find My app

- Open the Find My app.
- Select the “Items” tab or use Find Items app on Apple Watch.
- Make sure “Lost Mode” is disabled.
- Scroll to the bottom of the screen and tap “Remove Item”.

Note: Make sure the item is powered on and is near to your phone.

Locate your item

1. Find car charger when it is nearby:
 - Open the Find My app.
 - Select the “Items” tab or use Find Items app on Apple Watch.
 - Tap on your car charger name in the list.

1. Why doesn't Find Hub update the location?

Ensure your device has power and Bluetooth is turned on.

2. When can the item be located?

When item is separated from its owner for a period of time, it can be found by other Android/Apple devices that are part of Find Hub / the Find My network, and the owner can start to get the location of item.

3. How is the device designed to discourage unwanted tracking?

If any Find My network accessory separated from its owner is seen moving with you over time, you will be notified by your iPhone/iPad or it will emit a sound.

4. How is my privacy protected?

Only you can see where your item is. Your location data and history are never stored on the item itself. Devices that relay the location of your item also stay anonymous, and that location data is encrypted every step of the way.

5. What is the Find My network? And how does it work?

The Apple Find My network provides an easy, secure way to locate compatible personal items on a map using the Find My app on your iPhone, iPad, Mac, or the Find Items app on Apple Watch. Simply pair your compatible product with the Apple Find My app to view it right alongside your Apple devices.

6. If you removed the car charger, how to restore the car charger?

Power the car charger on and off continuously four times to restore it to factory settings.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
