

MUSIC BOXING TARGET

OPERATION INSTRUCTION

Please read the instruction manual carefully before use

Operating Instructions:

On/off : Press and hold for 3 seconds to turn on or standby.

- ⌘** : After turning on the device, short press to start/stop Bluetooth function. When the background music stops, it can be turned on. Search for Bluetooth devices in the phone settings to connect to Bluetooth.
- Speed** : When the display screen shows HXX, click LOOP to adjust. The larger the value, the faster the light changes. The default startup mode is H01.
- Mode** : When the display screen shows HXX, click MODE to adjust, and the window will display P01-P09, indicating that there are 9 automatically changing programs, each mode corresponds to a training area division, and the difficulty can be freely selected.

Installation instructions:

- Tear off the white sticker behind the 2 short Velcro (needle surface) adhesive in the accessory and directly stick the adhesive surface on the back of the machine, make sure to stick it parallel to the direction of the machine. (as shown in Figures 1 and 2)
- Tear off the two long Velcro (hairy surface) white stickers and stick them both on the wall. Attention: Before pasting it, confirm the height of the paste and the parallel distance between the 2 Velcro on the wall, as well as the distance between the device's charging plug and power outlet, which should not exceed 1.5 meters (As shown in Figure 3)
- After all 4 Velcro strips are attached, press the music boxing target onto the wall and you can start hitting it .

Product Introduction:

Boxing is a fighting sport in which two opponents of similar physique and ability use gloves to cover their fists and fight against each other. It is both an amateur and a professional sport. And during boxing training, boxing targets are usually used to train the speed and strength of the athletes. Due to the fleeting gaps of opponents in boxing matches, compared to strength training, what is more important is the player's offensive and defensive reaction ability. The product uses electronic control lights to guide and train the person's reaction ability. Through sound effects and light prompts, it can accurately hit the target point, thereby efficiently improving body coordination and reaction ability.

Product Parameters:

Input Voltage: DC 5V Power: 5W Working Voltage: 5V
Packaging Size: 15.7*15*3.1 Inch Battery Capacity: 1200 mAH

Charging Instructions:

Use the mobile phone charging dock (5V1A/2A) to charge with the included data cable. When charging, the red light will turn on, and when fully charged, the green light will turn on. When installing the boxing target, consider the location close to the wall socket.

Production date: July 2024	
This product has been inspected and meets the standard requirements	

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
