Warm Tip:

※ The battery of this product is not removable, due to the product's own wear

and tear, after being idle for more than a month may cause the product to be unable to switch on due to a flat battery, please users charge regularly every week to ensure that the device can work properly.

※ After the smart watch has been placed for a long time, if you use the computer USB charging, it will take more than ten minutes to display the charging icon, please wait patiently, it is recommended to use 5V 1A charger to charge.

※ Improper operation may cause the product to die, you can long press the on button for 10 seconds to force restart the watch.

※ If you use the mobile network, make a phone call, surf the Internet, video and other such high-energy applications, the watch will consume more power, at the same time, there may be a slight heat or hot phenomenon of the machine, which is a normal phenomenon. If the device indicates a high temperature alarm, please reduce the use of such high power consumption applications.

※ This product is subject to continuous improvement and the contents of the manual are subject to change without prior notice, please refer to the actual product.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
