Do not knock over the cat litter box during use.

Do not put your hands into the drum when the machine is running.

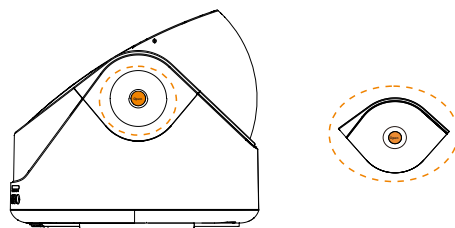

Do not switch randomly between cleaning and emptying tasks.

Be sure to wait for the current task to complete before

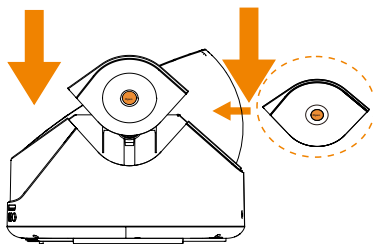

Installation Instructions

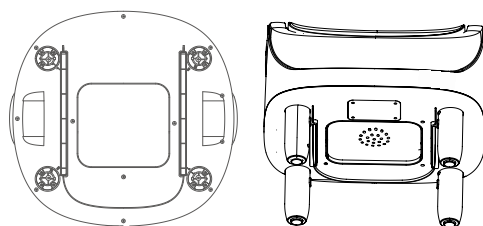

1-Open the package and take out the product; remove the fixing tapes on the front and back sides of the machine and the internal pearl cotton, and take out the support legs, cat litter bag, instruction manual, and adapter from the accessories box.

2-Press and hold the orange "PUSH" button on both sides of the bearing cover, then lift it up to remove the bearing cover and unlock the internal locking mechanism of the bearing cover; after unlocking, lift the bearing cover upwards to take it out, lift the drum upwards, and take out the pearl cotton at the bottom of the drum.

3.Ensure that the bearings on both sides of the drum are correctly installed in the slots. After installing the bearing press plate on the side with gears, install the bearing covers on both sides.

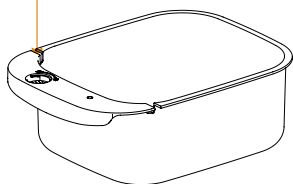

Notice

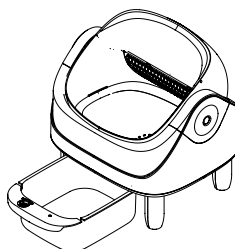

When assembling the support legs, please make sure they are properly installed and not cause the machine to be uneven or wobbly. Improper assembly will affect the normal use of the machine.

4 Insert the four support legs taken out directly into the four mounting holes on the base, and the installation is completed by insertion; note that the support legs should correspond one-to-one with the bottom.

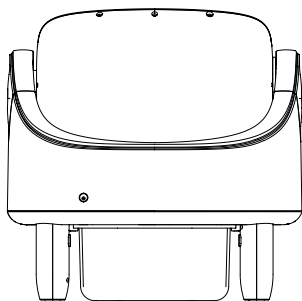

Aroma Box

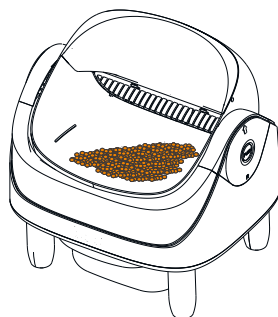

5 Install the aromatherapy in the designated position, and then rotate the aromatherapy cover to close it.

6 There are two sliders at the bottom of the machine. During installation, push the waste collection bin along the bottom sliders from the entrance below the front of the machine.

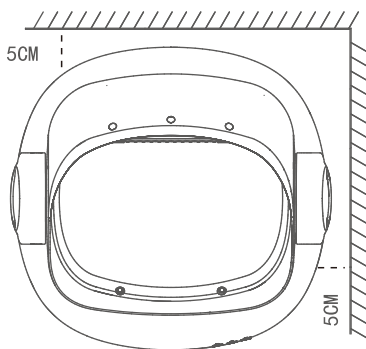

1-There are two sliders at the bottom of the machine. During installation, push the waste collection bin along the Bottom slot from the entrance below the front of the machine.

2-Add the cat litter into the drum until it reaches the "MAX" line.

1-After adding cat litter, please reconnect the power or click the "Smooth" button.

2-This intelligent litter box product is equipped with a gravity sensing device. Please place it on a 'hard floor' and do not lean it against the wall, with a distance of no less than '5CM' from the wall.

- 1 -Scan the QR code with your mobile phone or search for "Tuya" in the app store to download the app.
- 2-Install and register the app, and then click "Add Device" on the main page.

6. Main page

Button and Indicator Light Description

Indicator Light

- ① WiFi: Steady light indicates normal network connection, slow flashing indicates no connection, and fast flashing enters the network configuration mode.

②

Cleaning Completed: indicator light goes out.

③

Cleaning in Progress: Cleaning light blinks, and the indicator light goes out after cleaning is finished.

④

Cleaning completed, cleaning: The emptying and cleaning indicator lights flash rapidly at the same time to indicate reset pause.

Button

Press and hold for 5 seconds:
Unbind the device.

Single click: Cleaning mode
Double click: Unlock the child lock

Click: Smooth the cat litter.
Long press: Change the cat litter.

Problem	Solution
The machine did not respond after being connected to power.	Please check if the power is properly connected.
Failed to set up the network successfully.	Please check that the Wi-Fi name and password match. This device supports 2.4GWi-Fi, but please ensure you are connected to a 2.4G network.
The automatic self-cleaning cat litter box does not clean automatically.	Make sure the machine is set to automatic mode; after adding cat litter, reset the cat litter box once through the APP; then turn off and restart the device.
Anti-pinch safety feature triggered an abnormality during operation.	Check if the cat litter bag is smooth and free of wrinkles. Remove the drum and check if the infrared sensor above the litter box is blocked.
All three indicator lights are flashing rapidly at the same time.	Check if the waste collection bin and drum are properly installed. If they are, unplug the device, wait for 20 seconds, and then power it back on.
There is a significant difference between the cat's actual weight and the weight displayed on the APP.	Since the machine is constantly in motion, the data may have an error margin of about 10% to 20%, and may not accurately reflect your cat's true weight.
Does the indicator light keep flashing after adding cat litter?	After adding cat litter, please reconnect the power or click the  button.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
