

Pocket AM FM radio

User manual

1. FM receiving antenna
2. Harness
3. Frequency scale
4. Frequency tuning knob
5. Volume knob
6. Function switch
7. Speakers
8. Light switch
9. Headphone jack
10. Lighting
11. Type-c charging port

Preparatory work

Please switch this switch to the corresponding power supply mode before starting.

Steps for listening to radio programs

1. Push the function switch to the band you want to listen to (FM/AM), and push it to OFF to shut down.

2. Refer to the pointer combined with the frequency scale, turn the tuning knob to the radio frequency you want to listen to.

3. Turn the volume knob to adjust to the desired volume.

Attention:

1. When searching for FM stations, pull out the rod antenna and turn to the window. To find more stations.
2. Because of the limited AM signal, it is best to listen at night.

Use of external headset function

Choose the right headphones to plug into the headphone jack and enjoy the radio station alone.

Use of lighting functions

Push the light switch to  to turn on the light, push OFF to turn off.

Charge

Insert the distributed TYPE-C data cable into this port, then connect a 5V charger to charge the machine. When charging, the indicator light will turn on and turn off when it is full

Product specification

Power: Built-IN Lithium Battery 3.7 V
External 2(AAA) Battery (package not included)
Charge: TYPE-C 5V 1A
Frequency: FM: 87-108MHz
AM: 520-1730KHz
Size: 60x27x110mm

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
