APP Control

RGB Interior Lighting Kit

6 Pods

DC 12V only

WARNING

- Never use the TRENT LED APP when driving vehicles & obey all traffic laws.
- This product is for decorative or off-road use only. Check local laws and/or regulations before installation. This product is not DOT Approved.
- Do not install any accessory near or on airbags and never obstruct the driver's view.
- 12 Voltage installation only. Product designed to draw up to 2.8 Amps.
- This product is designed and engineered for **INTERIOR USE ONLY**.

BEFORE INSTALLATION

We recommend you to download the APP, connect and test your LED lighting product before installation.

INSTALLATION

1. Begin by laying out your new lighting system inside the vehicle. Place your light pods where you'd like to install them and plug the 12V plug into your vehicle's 12V socket. Next, choose a mounting location for the control box while making sure you leave enough wire to reach both the 12V socket and your light pods. Install your control box using the included two-sided tape and screws (if desired).
2. To install your light pods, clean your installation surface thoroughly with alcohol and allow to dry before installation. It is recommended that the temperature for installation is 65-90°F (18-32°C).
3. Peel off the 3M™ tape backer on your light pods and carefully apply to the desired area - Let adhesive set for at least 1 hour. Tuck and conceal all wires with cable ties. Note: We DO NOT recommend cutting the wires in order to shorten them.
4. Insert the 12V plug into the 12V socket. Push the ON/OFF button on your controller. The red light on controller and your light should light up.
5. Open TRENT LED APP, choose "Vehicle Lighting" category, and select "Original Animation Device" to connect. Mobile phone must be within Bluetooth range. **(Around 30'/9.14M from the control box)**.
6. You have now successfully installed your new lighting system and are ready to customize it using the TRENT LED APP. Please see the "info" page on TRENT LED APP for important tips and instructions.

To replace fuse, unscrew tip of plug, remove fuse and replace with like amperage.

ONE YEAR WARRANTY

We guarantee this product to be free of defects in material and workmanship for one year from the purchasing date. If a defect in material or workmanship occurs, call TRENT customer service at +86 (xxx) xxxxxxx for instructions on how to replace or repair it for free.

PROOF OF PURCHASE OR RECEIPTS MUST BE PROVIDED FOR ANY/ALL REPLACED OR REPAIRED ITEMS.

This guarantee does not cover normal damage to the product that is not the result of a defect in materials or workmanship such as, for example, normal wear and tear or damage resulting from an accident. Shipment of any product back to TRENT is at the consumer's expense. TRENT limits its liability only to the replacement of its products, not incidental or consequential damages to other property. Some places do not allow the exclusion or limitation of incidental or consequential damages.

FCC RF Radiation Exposure Statement
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

FCC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.
