Introduction to wireless intercom connection operation (intercom and music sharing are turned off by default every time you turn on)

I: Intercom pairing/back connection

After the machine is turned on, the two devices long press “intercom / light key” to enter the intercom mode, the intercom indicator flashes slowly, accompanied by a tone “intercom pairing”, after entering the intercom mode, the automatic pairing connection. The connected machines, after power on, long press the “intercom key” to enter intercom mode, the two machines are automatically connected

Phone Answer: the two machines are connected to the intercom successfully, the wireless is also connected to the cell phone, when there is a phone call, it automatically switches to the phone to answer the call, after hanging up, the intercom is resumed.

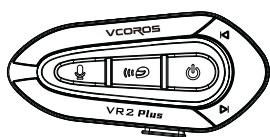

II: Music sharing (effective distance music can be shared to N devices)

After multiple devices are turned on, press and hold the “Music sharing/Voice assistant button” to enter the music sharing mode, accompanied by a tone “Music sharing receiving mode”. After entering the music sharing receiving mode, double-click the “Music Sharing/Voice assistant button” to switch the music sharing transmitting or receiving mode; Start music sharing pairing: one device is required to be in the music sharing transmitting mode, and the other device is in the music sharing receiving mode. After the pairing is successful, the machine that enters the music sharing receiving mode will have a “Music sharing connection is successful” tone (note: There will be no successful pairing tone in the music sharing transmitting mode), and the music sharing pairing is successful at this time; You can share the wireless music of the machine that enters the music sharing transmission mode to other machines that enter the music sharing reception mode. Note: Multiple devices are connected to play music wirelessly, the machine that enters Music Share Receive Mode can only hear music from the cell phone wireless player of the machine that enters Music Share Transmit Mode.

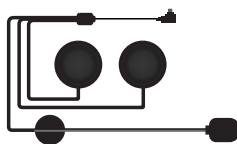

III: Clear the intercom pairing and restore the factory settings

Clear pairing information: When turning on in any mode, press and hold the volume down and volume up keys for 5S at the same time to clear all pairing information, all indicator lights flash for 5S, return to wireless mode, successfully clear the intercom pairing, and restore the factory settings

Product Parameter

Product Model	VR2 Plus	Waterproof rating	IP56
Lithium battery	1000MAH	Standby time	270H
Music sharing duration	12H	Intercom duration	15H
Endurance	18H	Charging Voltage	5V/1A
Charging time	≤2.5H	Applicable models	Motorcycle / Electric Vehicle

Caveat

1. Do not put the product into open flame to avoid explosion;
2. Do not disassemble the product to avoid damage to the product's electronic components;
3. Please do not close to sharp objects to cause damage to the product;
4. Please place it in a dry place if it is not used for a long time;
5. Before using the wireless device, please fully charge it first.
6. If the red light does not come on when charging, the voltage may be too low;
7. In order to extend the life of the built-in polymer battery, please charge the device at least once a month.

Instruction warning

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions.

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

* RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
