

Regulatory Information

USA Regulatory Compliance

FCC Title 47, Part 15 (47 CFR 15) of the Code of Federal Regulations (CFR)

Devices ("Devices") is in compliance with Title 47, Part 15 (47 CFR 15) of the Code of Federal Regulations (CFR) as written by the FCC. Operation of Devices is subject to the following two conditions:

- (1) Devices may not cause harmful interference and
- (2) Devices must accept any interference received including interference that may cause undesired operation of Devices.

Any operational changes or modifications must be expressly approved by the party responsible for FCC compliance. The user's authority to operate Devices may be revoked if changes and modifications are implemented without approval.

Note: Devices have been tested and found to comply with the FCC's rules for a Class B digital device as outlined in 47 CFR 15 of the FCC's rules and regulations. These limits are designed to provide reasonable protection against harmful interference when Devices is operated in a commercial environment. Devices can generate, use, and radiate radio frequency energy. If not installed and used in accordance with the instruction manual, Devices may cause harmful interference to radio communications. However, there is no guarantee interference will not occur in a particular installation. If Devices does cause harmful interference to radio or television reception, which can be determined by turning the radio on and off, the user is encouraged to try and correct the interference using one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a different circuit than the receiver.
- Consult the dealer or an experienced radio/TV technician for help.

RF Communication Exposure Warning

The transmitter must be installed and operated in accordance with the provided instructions. The antenna(s) used for this transmitter must be installed and operated at least 20 cm (0.95 ft) from all persons and cannot reside with or operate in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions to comply with RF communication exposure regulations.

California Proposition 65 Warning

This product may expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

Canada Regulatory Compliance
Conformité réglementaire au Canada
ICES-003
CIEM-003

This Class B digital apparatus complies with Innovation, Science and Economic Development Canada (ISED) Interference-Causing Equipment Standard 003 (ICES-003) and Radio Standards Specification RSS-310.

Cet appareil numérique de classe B est conforme à la norme 003 (ICES-003) sur le matériel brouilleur d'Innovation, Sciences et Développement économique Canada (ISED) et à la spécification des normes radio RSS-310.

The operation of this apparatus is subject to the following two conditions:

- (1) The apparatus may not cause harmful interference.
- (2) The apparatus must accept all interference including interference that may cause undesired operation of the device.

Le fonctionnement de cet appareil est soumis aux deux conditions suivantes :

- (1) L'appareil ne doit pas causer d'interférences nuisibles.*
- (2) L'appareil doit accepter toutes les interférences, y compris celles qui peuvent entraîner un fonctionnement indésirable de l'appareil.*

RF Communication Exposure Warning
Avertissement relatif à l'exposition aux communications RF

The transmitter must be installed and operated at least 20 cm (0.95 ft) from all persons and in accordance with the provided instructions.

The antenna may only be operated with express ISED approval of the antenna type and maximum gain. To reduce potential radio interference, the antenna's isotropically radiated power (e.i.r.p.) should be equal to or less than the necessary amount for successful communication. Operation in the band 5150-5250 MHz is approved for indoor use only to prevent harmful interference with co-channel mobile satellite systems.

L'émetteur doit être installé et utilisé à au moins 20 cm (0,95 ft) de toute personne et conformément aux instructions fournies.

L'antenne ne peut être utilisée qu'avec l'approbation expresse de l'ISED concernant le type d'antenne et le gain maximum. Pour réduire les interférences radio potentielles, la puissance isotrope rayonnée (p.i.r.e.) de l'antenne doit être égale ou inférieure à la quantité nécessaire pour une communication réussie. Le fonctionnement dans la bande 5150-5250 MHz est approuvé pour une utilisation à l'intérieur uniquement afin d'éviter les interférences nuisibles avec les systèmes mobiles par satellite à canal commun.
