

Note:

1. The receiver should not be installed upside down to avoid affecting the unevenness of the outer cover and the ceiling.
2. It is strictly prohibited to switch the input and output wiring of the receiver between input and output.
3. The working voltage of this product is AC: 220V-240V.
4. If there is a wall switch on the fan, it must be in the on state to effectively control it.
5. Connect the white line to the zero line and the blue line to the live line for 220V mains power. The wiring method for the output line is shown in the picture.
6. When using the remote control, please check whether the battery is correctly installed. Pay attention to the positive and negative poles of the battery. The indicator light will flash every time you press the Control key on the handle.
7. This product integrates a built-in 2.4GHz wireless transceiver module, enabling wireless control of fan speed, lighting on/off and brightness via the included remote control handle without additional wiring.

Output line wiring method.

2.4G Wireless Module Connection & Usage 1. ****Pairing (Code Matching)**** Power on the fan light receiver, then press and hold the ****Power**** key on the remote control handle for 3 seconds **within 5 seconds after power-on**. The Output LED on the receiver will flash rapidly; pairing is successful when the LED stays solid for 1 second. One handle can pair with up to 4 receivers for multi-device control. 2. ****Resetting Pairing**** Power on the receiver, press and hold the ****Power**** key and ****Fan Speed Down**** key simultaneously for 5 seconds. The Output LED will flash 3 times quickly, indicating all previously paired handles have been cleared. 3. ****Operation Notes**** - The effective wireless control distance is 8-10 meters in an unobstructed indoor environment. - Avoid installing the receiver near metal objects, microwave ovens, Wi-Fi routers or other 2.4GHz frequency devices to prevent signal interference. - If the handle response becomes slow or unresponsive, replace the CR2032 button battery (follow the polarity marking inside the battery compartment). - If pairing fails, power off the receiver completely for 10 seconds, then repeat the pairing steps.

Zhongshan Justrontium Electronic Technology Co., Ltd
Production factory address: 2nd Floor, No. 14, Kanglin Street, Guzhen Town,
Zhongshan City.

FCC Warning Statement: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
