User Manual	1.Appearance Description	2.Operating Instructions	3.Download APP, install and connect devices	5.Precautions 1. Do not use the product in environments with water droplets or humidity. 2. Please use the charging cable provided with this product for charging. 3. The use of this product is strictly prohibited. Please handle it with care and do not throw it or hit it. When the product is found to be damaged, please pay attention to safety and avoid touching or using it. The product does not have waterproof function. It is strictly prohibited to use the product in rain or sea water. In this product support photography and video recording functions. It is strictly prohibited to use this product for unauthorized thing and other activities. Please strictly follow local laws and regulations to handle the use of this product. 6.Operating frequency band of the device Working frequency band: 2402-2480MHz Maximum power: ≤10m	FCC Statement The device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) The device may not cause harmful interference, and (2) The device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. The equipment generates, uses and can radiate radio frequency energy and, if not properly used or shielded with the instructions, may cause harmful interference to radio communications. However, it does not guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and the receiver. - Consult the equipment user's guide for a closer distance to the device that is which the receiver is connected. - Consult the dealer or a qualified technician for help. Therefore, the user is cautioned not to modify the equipment in any way that would void the warranty or make the equipment non-compliant with the applicable FCC rules. The device can be used in portable operation conditions without restriction.
