FIGURE A

FIGURE B

FIGURE C

- 6 The second Bluetooth device connection needs to repeat the above steps
- 7 Devices that have successfully connected will automatically reconnect upon next use without requiring pairing.

YOU CAN PAIR TO A SECOND COMPUTER WITH HOT KEYS

Your Keyboard can be paired up to 3 different computers using the hot keys to change the channel

Easy switch by hot keys: Fn+1=BT1 Fn+2=BT2 Fn+3=BT3

A short press: switch channels (from one computer to another).

The corresponding indicator light turns blue for 3 seconds before turning off.

System selection:

Press Fn+Q/W/E once briefly, and the Bluetooth indicator will flash rapidly three times.

Fn+Q=Android

Fn+E=iOS

Fn+W=Windows

Please select the right system for full compatibilities after paired to your device.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
