I. Operating Steps:

(1). Download Methods
Scan the QR code on the right to download, or for Android phones, enter "Yuehui" in the "App Store" to download the app. For iPhones, search for "Yuehui" directly in the App Store and download it, then follow the prompts to install and use.

(2). Wireless Device Appearance and Function Indicator Diagram

① Monitor

Battery Level Indicator Icon
NOTE Meeting Recording Icon
CALL Recording Icon
Recording in progress
Suspended
Wireless Connection Mode Icon

② Power button
Long press: Power on/off (approx. 5 seconds), powers on to enter recording mode
Short press: Pause/resume recording
Double press: Switch between "NOTE" and "CALL" recording modes

③ Recording button
Flip the switch to the left: Start recording
Flip the switch to the right: Stop recording
Save locally and sync to the app

II. Wireless Connection Process for the Product

Connecting wireless devices: Wireless devices require the "Yuehui" app for operation.

Turn on wireless search — Open the app and tap "Connect."
Connecting devices — Waiting to scan nearby devices. Select "Connect."
Confirm App Connection — The app's home screen displays the device's "battery level" and "storage."

1

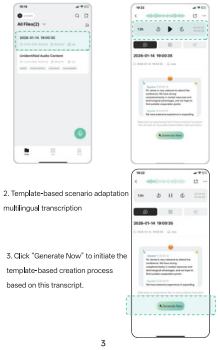
After binding a device, if another user needs to connect to it, the current user must first unbind the device.
One account can bind multiple devices, but only one device can be connected at a time.
Messages are not shared between accounts.

II. Core Functions: Speech Transcription and AI Summarization

(1). Built-in powerful speech recognition engine delivers fast transcription speeds.

Voice Transcription — Built-in powerful speech recognition engine delivers fast transcription speeds, supports multilingual recognition, and achieves high transcription accuracy.
AI Summary — AI intelligently extracts core elements from meetings and summarizes key discussion points.
Mind Map — Automatically convert recorded content into structured mind maps, clearly presenting branching ideas.

2



2. Template-based scenario adaptation multilingual transcription

3. Click "Generate Now" to initiate the template-based creation process based on this transcript.

3

4. Built-in templates for 10 specific purposes, including meeting minutes, interviews, and speeches.

5. High-accuracy transcription across all language scenarios, effortlessly handling cross-border communication and international conference recording.

4

IV. Basic Functions:

(1).High-definition functionality

Advanced Noise Reduction Technology One-Tap Recording Activation

1. Click the "Start Recording" button to display the recording duration in real time on the page.

2. Click the "Pause Recording" button to stop the duration from updating.

3. Click the "Continue" button to resume playback from where it was paused.

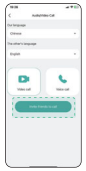
5

4. After completing the recording, click the "Save" button. A "Name File" input box will appear. Enter the desired name and confirm to save.

(2).Audio Translation Mode

1. Advanced Noise Reduction Technology One-Tap Recording Activation

2. Go to the "Video/Voice Calls" page.



6

3. Select the following options in sequence: Video/Voice Call > My Language > Other Party's Language > Invite Friends to Call.

4. Invite Friends: Share the link via WeChat, Skype, email, etc. Friends can simply open the link to start a call.

7

(3).Meeting Minutes

1. Enter the "Recording List" interface and tap the record button to start the recording process.

2. After clicking the recording button, the "Recording Language" settings box will appear. Select the audio language and set the recording title.

8

3. Click "Start" to begin real-time transcription, then click "End" to finish recording and save it to the list.

V. Equipment Charging and Usage:

Remove the dedicated magnetic charging cable from the packaging box and insert it into the charging port of the "Recording Card Translator."
The charging icon will flash to indicate charging is in progress. Once fully charged, the charging icon will display a full battery indicator.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
