setup guide

PINWHEEL.COM

Welcome!

Let's setup your Pinwheel watch

1

Create Caregiver Portal account or add a child

Go to **caregiver.pinwheel.com** or use the Pinwheel mobile app.

2

Power on and connect to wifi

Press and hold the red button.

Click Connect and login to your network.

3

Pair watch to your account

Scan QR code shown on the watch.

Confirm the correct child is logged in.

4

Activate cellular plan

Your watch is ready to use!

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular

Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United

States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged

over one gram of tissue. The standard incorporates a sub-substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

SAR compliance for body-worn operation is based on a separation distance of 0 mm between the unit and the human body.

Carry this device at least 0 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 0 mm between this device and your body.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided.
