

Doorbell camera

Instruction manual V1.0

Before using this product, read the Quick Guide carefully and save it for future reference

V1.1

1. Features

- The LED flashes blue and the device is waiting to start pairing.

2. Replace the battery in time.

It is recommended to check the battery level in a timely manner to prevent leakage of dry batteries and the resulting rusting of the battery contacts.

Note: The Type-C interface only provides a linking function and does not have charging capabilities.

Note:

1. If the doorbell is used too many times a day, it will consume a lot of battery power, please replace the battery in time. When you ring the doorbell, the battery drains power.
2. Press the reset button on the back of the device to restore all the settings of the device, and the APP will automatically remove the device.

3. Set up your Doorbell

Steps 1

Download and install Tuya Smart App. Scan the QR code below or search for Tuya on the App Store or Google Play. Download and install the app

Tuya Smart

Steps 2

Open Tuya Smart, register your email or phone number, and log in to your account.

Steps 3

To add your doorbell, select "+" in the top right corner of the home page. Then select Smart Camera.

Note:

a.If the device is not automatically searched, please click "Turn on BT" in the picture below and set "Allow device permissions near this application".

b. Access permission management, enable WLAN, BT, and nearby devices, and select Always Allow.

Steps 4

1. After adding a doorbell, enter your 2.4ghz wireless network account and password and click "Next". When connecting, keep your router, mobile phone and doorbell as close as possible. After adding a doorbell, click "Finish".

Note:

1. Please make sure you are connected to the 2.4GHz wireless network, as this device does not support 5GHz wireless networks.

2. If the connection is not successful, please reset the device and reconnect
3. If the connection timeout, please check whether the power is too low, if it is too low, please charge the device in time and then connect.

Steps 5

When connecting, please ensure that the device's battery is installed correctly and has sufficient power, and that it is installed within a stable and effective WiFi signal range. Smart doorbell host added successfully.

Note:

Be sure to turn on push notifications on your phone.

1. Navigate to the Settings > Notifications > Turn on.
2. A list of applications that support push notifications will appear.
3. Tap the Tuya Smart App and enable notifications.

4. Doorbell and ding Dong matching

Connect the video doorbell to the wireless indoor ding-dong and get an instant alert in your home when someone rings the doorbell. When you are at home, you don't need to check your video doorbell app to hear the doorbell ringtone! Indoor Ding-Dong can be plugged into any wall outlet, or you can place it anywhere in your home.

Note:

Video doorbells are only compatible with our wireless doorbells, not with any other traditional doorbells.

Wireless indoor ding-dong overview

6. Frequently asked questions

Question: How do I reset the doorbell?

Answer: Press and hold the reset button for 6 seconds.

Question: How do I share a video doorbell with my family?

Answer: 1. Click on the doorbell from the home page to view the live broadcast.

2. Tap the settings icon in the upper right corner.

3. Select "Shared Devices"

4. "Add Sharing" and enter the name of the account you want to share or follow the instructions in the app to set up your family.

Question: How many users can watch videos at the same time?

Answer: Up to 4 users can view the video feed. Both iOS and Android are compatible.

Question: Does 5G wireless network support?

Answer: Not supported. Only support 2.4G wireless network.

Problem: My doorbell signal is not good.

Answer: Your doorbell may be too far away from the wireless router, or there may be some obstruction between your doorbells that will reduce the signal strength. You can try relocating the router or installing a signal extender/repeater for the wireless router.

Question: Is this device battery-only powered?

Answer: Yes. It is only battery powered. No wires are required.

Question: Can I use Tuya Smart Life Software to ring the doorbell?

Answer: Yes, you can use Tuya Smart at the same time.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
