Product Name	7.9" 3D Photo Frame
Product Model	JT079H-A03W
Base screen	7.9 inch LCD
Resolution ratio	1536*2048
Product Dimensions	192.7*152.8*46.1 (mm)
Operating environment	indoor
Best viewing distance	Above 0.5m
Display area	159.7(H)*119.8(W)mm
Screen luminance	250cd/m ²
Contrast	1000:1
Response Time	35ms
Package Dimension	213.5*213.5*59(mm)
System	Android 11 RK3566
Force touch	Yes
Battery capacity	4000mAh
Input power	100V~240V AC 50/60Hz 5V 2.4A

Input interface	Type-C
Vsion Number	49
Raster format	Hololens
playback software	Holo OS
Content formats	Multi-tile
Plugin support	/

Product configuration

01	7.9" 3D Photo Frame x1
02	charging head x1

04/ Fault analysis and troubleshooting

Fault analysis and troubleshooting

- 1) The display screen is not bright: please check the battery allowance of the picture frame; Check the power interface to ensure that the display is plugged in, and ensure that the power supply is normal.
- 2) The screen blinks: please restart the device. If the fault cannot be removed, please contact our technical personnel
- 3) No sound: Go to Settings → Sound to set the volume.

05 / Notes

operation and maintenance

1)Note:

The display surface is made of glass. Do not use mechanical impact, such as impact or fall from height.

Do not put too much pressure on the surface of the display

or the connecting area of the LCD module.

so as not to cause tint change;

If the surface of the display is stained. wipe it with a soft dry cloth. If you need to use a solvent. use alcohol only.

2)Environment:

Maintain a dry working environment and avoid contact

with chemicals; Do not expose the product to rain, humidity or direct sun environment. so as not to affect its normal use;

Temperature range.

Storage temperature:20Cto 60C.Operatingtem

perature: 0'C to 50Cwhen the relativehumidity

《=65.do not block the ventilationholes. Do not

place the displaynear a radiator,heat source.

orother devices that may affectproper ventilation.

3)Waste recycling tips:

In order to better care for and protect the environment, when users no longer need the product or the product life is terminated, please comply with the national laws and regulations on recycling of electrical and electronic products, and give it to local manufacturers with nationally recognized recycling qualifications for recycling.

4) The following problems may occur in the picture frame display is a normal phenomenon, not a quality problem of the display screen:

- a. Due to the characteristics of LCD display, the picture may flicker when first used. Please close the display screen and then open it again to ensure that the screen no longer flickers;
- b. The effective pixel of LCD display reaches or exceeds 99.99%, but there will be 0.01% or less pixel loss or brightness loss during display.
- c. When you use different desktop graphics, the image brightness may be slightly uneven;
- d. Due to the characteristics of LCD display, pixel residue will not occur in its normal operation. However, when the same static image is displayed for a long time before switching images, the previous residual image may remain, known as "residual image". The best way to avoid it is to run a screen saver for monochrome or motion images when you're not using the system.

06 / Friendly Trips

For TYPE-C cable, normal insertion and removal procedures,,

Step 1: Place the device back up horizontally on the desktop,

In the second step, put the TYPE-C data cable into the cable slot of the device as shown in the figure, align the interface with the TYPE-C charging port, and push the data cable interface into the charging port with your thumb.

The third step, as shown in the figure, just pull the data cable gently from the bottom of the device to disconnect the power supply (do not break the TYPE-C plug from the position, which is easy to damage the TYPE-C head).

Charging precautions: When the photo frame is completely out of power, the device will be in a low power protection state, in order to ensure that the screen can display images normally, after the device is connected to the power supply, please wait for the screen to display more than 10% of the power, and then start to use.

Shutdown note: When the device is shut down, press and hold the power button. When the "Shutdown" option appears on the screen, click "Shutdown".

Do not hold down the power button to forcibly shut down the device. This operation may cause an exception on the screen.

For TYPE-C cable, normal insertion and removal procedures,

1

Step 1: Place the device back up horizontally on the desktop.

2

Step 2: put the TYPE-C data cable into the cable slot of the device as shown in the figure, align the interface with the TYPE-C charging port, and push the data cable interface into the charging port with your thumb.

3

step 3, as shown in the figure, just pull the data cable gently from the bottom of the device to disconnect the power supply (do not break the TYPE-C plug from the position, which is easy to damage the TYPE-C head).

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
