FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance may void the user's warranty. The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to you, you may wish to take the following steps: (1) Turn off the equipment for a short time to see if the interference stops. (2) Increase the separation between the equipment and receiver. (3) Connect the equipment to an outlet on a circuit different from that to which the interfering equipment is connected. (4) Consult the dealer or an experienced radio/TV technician for help. The device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

SAR Information Statement

Your Smart Phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency energy. The Federal Communications Commission (FCC) has adopted guidelines for the protection of humans from the potential effects of exposure to radio frequency energy. The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to you, you may wish to take the following steps: (1) Turn off the equipment for a short time to see if the interference stops. (2) Increase the separation between the equipment and receiver. (3) Connect the equipment to an outlet on a circuit different from that to which the interfering equipment is connected. (4) Consult the dealer or an experienced radio/TV technician for help. The device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
