### ISED Statement:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:  
(1) This device may not cause interference, and  
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil contient des émetteurs/récepteurs sans licence conformes aux normes CNR d'Innovation, Sciences et Développement économique Canada. Son fonctionnement est assujéti aux deux conditions suivantes :  
(1) Cet appareil ne doit pas causer d'interférence ; et  
(2) Cet appareil doit tolérer toute interférence, y compris celles qui pourraient entraîner un fonctionnement indésirable.

### RF Exposure Statement

SAR tests are conducted using standard operating positions according standards with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.  
This model product has been tested and meets the RF exposure guideline SAR Limit 1.6W/Kg with the test distance 0mm for body worn. The highest SAR<sub>avg</sub> value is 0.72 W/Kg. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with RF exposure requirements, and should be avoided

Les tests SAR sont effectués en utilisant des positions de fonctionnement standard conformément aux normes, l'appareil émettant à son niveau de puissance certifié le plus élevé dans toutes les bandes de fréquences testées. Bien que le SAR soit déterminé au niveau de puissance certifié le plus élevé, le niveau SAR réel de l'appareil en fonctionnement peut être bien inférieur à la valeur maximale.

Ce produit modèle a été testé et répond aux directives d'exposition aux radiofréquences, limite SAR de 1,6 W/kg avec une distance de test de 0 mm pour un port sur le corps. La valeur SAR typ la plus élevée est de 0,72 W/kg. Les attaches de ceinture, étuis et accessoires similaires ne doivent pas comporter de composants métalliques. L'utilisation d'accessoires non conformes à ces exigences peut entraîner une non-conformité aux exigences d'exposition aux RF et devrait être évitée.

The device is restricted to indoor use only when operating in the 5150 to 5250MHz frequency range.  
L'appareil est limité à une utilisation à l'intérieur seulement lorsqu'il fonctionne dans la gamme de fréquences de 5150 à 5250 MHz.
