15-Channel Remote Control

Technical specification

Battery: 3VDC (AAA battery×2)	Battery life: >2 years
Working temperature: -10℃~+50℃	Radio range: 150 meters outdoor, 35 meters indoor
Radio frequency: 433.05~434.79MHz	Dimension: 144mm×45mm×14.8mm

Warning

- 1, The remote control couldn't expose to moisture or be struck heavily, or else the remote control life will be affected.
- 2, If the remote control is not so sensitive or the radio range becomes shorter, pls check whether to change the battery.
- 3, It's forbidden to use different type battery to avoid any dangerous risk.
- 4, Dispose of used batteries properly.

1. Jog / Tilt Mode

Note: The JOG UP and JOG DOWN buttons only control the channel where the current remote control is located, Release the button to send code.

2. DIP Switch Function

Note: The factory defaults to "1" and defaults to bidirectional mode.

3. Lock / Unlock Combo-key Operation

Note: 1,Both setting buttons (P2) can be operated.
2,The factory default is unlock status, repeat same operation to switch status circularly.
3,Under lock status, the combo-keys don't work; Under unlock status, the combo-keys will work normally.

5. Battery Check Function (In bi-directional mode)

Note: 1,Only the paired motor can check the battery and the current channel can only check one paired motor.
2,Only the motors which are paired by long pressing STOP button for 25 will have the battery check function.

6. Motor Percentage Running (In bi-directional mode)

4. Set Number of Channels

Note: In the setting status, press UP or DOWN button to exit quickly.
Repeat the same process if you want to adjust the Max. channels.

FCC Warning

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
