 indicator.

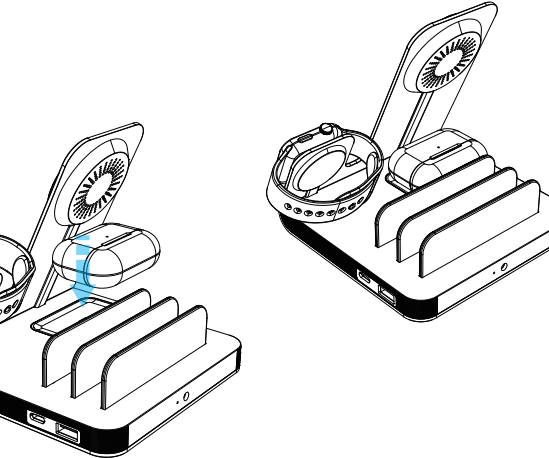

Operating instructions:

Charging the phone: Place the phone in the wireless charging area of the phone. The charging indicator on the phone's display will light up to indicate that the phone is charging.

g the watch: Put the watch on the wireless charging area, and align
s; the "Charging indicator" on the watch will light up, indicating that
charged properly.

g the wireless bluetooth headset:Put the bluetooth headset in the wi
ea,the indicator will light up on the earphone, showing that the earph

Insert the supplied USB A-Lightning cable into the power port of the device. The Lightning connector output cable can charge iPhone and other devices.

Insert the matching USB C-C port cable into the power port of the device. The output C port can charge Type_c devices (e.g., Android cell phones) and devices with Type_c ports, headphones with Type_c ports, etc.

This product is powered by a 12V/3A DC port adapter and is connected to the power source. If the base light blinks three times and then goes off, the power source is not connected.

Wireless charging indicator for cell phone: after connecting the power, the indicator light blinks three times and then goes out, put the cell phone in the charging position, the cell phone shows normal charging, the indicator light is always on for 3 seconds and then goes out. If there is charging abnormality (such as low battery, over-temperature, etc.), the light will blink.

Specification Parameter:

Model	5 in 1 Magnetic Wireless Charger	Model	G8000
Product size	133*130*133mm	Power Supply Port	DC
Input	12V --- 3A	Output Power	36W

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
