

QUICK START GUIDE

Indoor 2.4/5GHz WiFi PT Camera

Thank you for using this APP. Please setup the camera by following the steps below.:

1. In order to connect the camera stably, please install it in the range that could strongly accept the Wi-Fi signal of the home wireless router. Before installing the camera, please determine the installation location (flat surface or wall).

When the camera is installed in a place where is difficult to obtain Wi-Fi signal, please use a Wi-Fi extender to extend the Wi-Fi network range.

2. Connect power adapter to the camera. Please keep the wires away from children to avoid any potential danger.

In order to get the best image quality, please don't touch the camera lens with your hands.

Please make sure to use the matching power adapter cable, or the camera may not work properly.

1 APP Installation

1. Download the APP

- Download the app from the App Store (iOS devices) or Google Play (Android devices).

- Scan the QR code below to download the APP

For iOS

For Android

- Connect the power connector to the camera and plug the power adapter into a power outlet. Wait until the camera status LED turns solid red.

Recommended system specifications

Wi-Fi 802.11 b/g/n/ac/ax and BLE 5.4

iOS 11.0 or higher

Android OS 6.0 or higher

Application pre-check function

Make full use of APP to monitor your home (the supported functions may be varied by different models):

Event notification
Motion/Human/Vehicle/Package/Sound detection
Customized real-time monitoring
Voice Intercom

2 Register an account

Run the APP, input user name and password, Choose Region, then tap <Login>.

Please select the micro SD card and click <Format> to format the micro SD card. Tap <Next> after formatting successfully.

Select a desired way to mount the camera according to the installation Guide.

Please Tap <Next>.

Please Tap <Next>.

Please Tap <Next>.

Tap <Finish> to finish camera configuration.

Introduce the WiFi PT Camera

Understanding LED indicator status lights and information:
The color of the LED indicates the device's current status.

LED	LED Status	Device Status
●	Red light on	Device booting
●	Red light blinking	Waiting for Wi-Fi configuration
●	Blue light on	Wi-Fi connected
●	Blue light blinking	Operating in app
●	Blinking between red and blue	Network disconnected
●	Purple light on	Firmware upgrading
●	Light off	Power off / rebooting after reset

4) Mounting the Camera

Mount the PT camera on ceiling:

Place cube camera on a table

Note:

Before mounting the camera:

- Unplug the camera power connector from the power adapter.
- Find a spot where the camera can easily reach a power outlet.
- Make sure the camera receives a strong Wi-Fi connection in the spot where you want to mount it so that it can stream video to your app.

FC Compliance Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

CE Simplified EU Declaration of Conformity

This device is in compliance with the essential requirements and other relevant provision of Directive EN300328, EN301489-1, EN31489-17, EN IEC 62311, EN IEC 62368.
