

Smart Watch manual

Thank you for choosing our smart watch. You can read this manual to fully understand how to use the equipment. This device is mainly adapted to mobile phones through Bluetooth connection, providing a variety of practical functions and services. To make it easy for you to operate the watch, and has developed many features for human movement and health. The company reserves the right to modify the contents of this manual without any prior notice.

This product does not support IP 68 waterproof, does not support rain, hand washing, swimming, hot shower or sauna, etc. It can't prevent water vapor. If the watch is damaged by water due to failure to follow the instructions, the company will not provide free warranty.

Operating instructions:

Key functions:

1、 Switch key: long press to switch on and off, short press on the dial interface to enter the style interface; short press to enter the function interface to return to the previous level; In the menu interface, double click to switch the style interface; press to force restart.

Touch gesture: double-click the dial interface to enter the voice assistant; swipe right to enter the split-screen interface; swipe left to enter the widget; Swipe down to enter the status bar interface; Swipe up to enter the shortcut menu interface.

Dial switching: long press the dial interface to switch the dial.

Strap replacement: quick release design, easy to install.

Charging instructions:

Support magnetic charging, put the watch on the magnetic charger when charging, support computer USB or mobile phone 5V standard charger. It can be filled in about 150 minutes.

Connection between watch and phone:

First, the mobile phone should download the APP "RDFit" to the mobile phone and install it in

two ways.

1. IOS/Android mobile phone users:

Scan QR Code below through the mobile browser, or sweep it with the WeChat, open the interface, and select Android/iOS in the interface. Open the download in the mobile browser.

The QR Code below is the download of RDFit APP

Android/iOS

2. Search for "RDFit" to download from App Treasure, Google Play, and various mobile app stores on Android phones. Apple phones can be downloaded by searching for "RDFit" on the App Store.

After the download is completed, there will be various permission reminders during the installation process, all click to agree. The watch and the phone need to be connected to two Bluetooth: 3.0 and 5.0 to achieve all the functions.

Bluetooth connection method: After the installation is completed, open "RDFit" and open the Bluetooth of the mobile phone. RDFit will have a notification prompt. Click OK. Click more in the lower right corner, enter the scanning device, search for the Bluetooth address and click Connect. Some Android phones need to turn on the phone's GPS to find the Bluetooth name of the watch.

How to identify the success of Bluetooth connection: press the button under the watch in the standby interface to enter the taskbar, and the Bluetooth icon of the watch is highlighted in white. It indicates that the Bluetooth connection is successful; when the color of the Bluetooth

symbol is set to gray, it indicates that the Bluetooth is not connected.

A simple treatment method for common problem: because that Bluetooth protocol of each mobile phone brand is not uniform, Sometimes the Bluetooth connection between the mobile phone and the watch is unstable, so you can turn off the Bluetooth of the mobile phone and reconnect it again. Or restore the watch to factory settings.

How to set up incoming mail notifications:

Enter Settings: Application Management, find "RDFit": Permission Management, and open all. Then enter the notification management: find "RDFit" and open all permissions.

Open "RDFit": More: Application Push: Open the background running permission, and enter the unlimited selection. When you return, you will be prompted to open the self-start again and enter the open. Back, select the APP for synchronous information notification, such as QQ WeChat, and select Open.

Note: If the computer version of the WeChat is online at the same time, the mobile phone will not receive the letter notification. Some mobile phones also need to add "RDFit" to the power saving white list to avoid being turned off by the mobile phone when the battery is low.

What should I do if I can't receive the notice?

First of all, the notification function of the watch is only to synchronize the notification function of the mobile phone, such as incoming calls and letters, QQ WeChat reminders. If your mobile phone does not receive notifications, then the watch side is not received, to set up in the mobile phone: notification function. Find the corresponding APP and open the permission notification.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
