Notes

- The power delivered by the charger must be between min 0.3W and max 3W.
- Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and the receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.
- This device complies with part 15 of the FCC Rules.
- Caution: To avoid fire or explosion, do not use this device near flammable liquids, gases, or vapors.
- The device has been evaluated to meet general RF exposure requirements.
- The device can be used in portable exposure condition without restriction.
