

User Guide

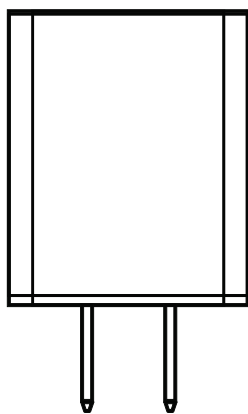

Rechargeable Indoor Pan-Tilt Camera

What's Included

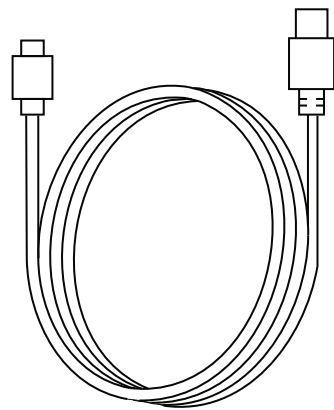

You Sensforge Indoor Pan-Tilt Camera comes with everything you need for a quick and easy setup:

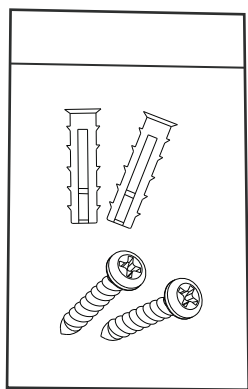

Camera

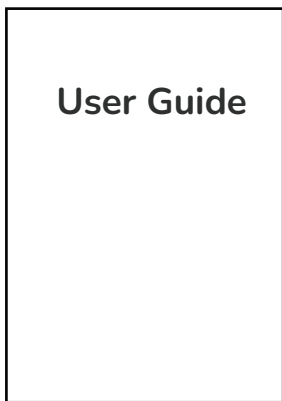

Power Adapter

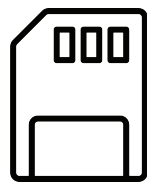

Power Cable

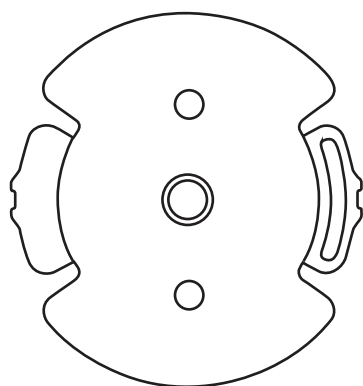

Screw Kit

Quick Start Guide

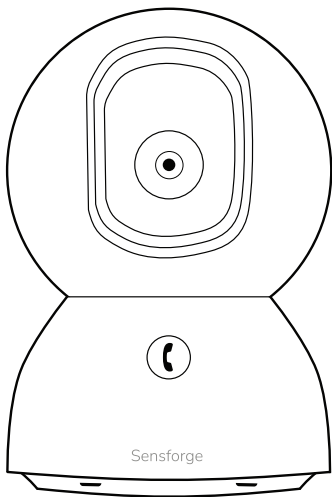

SD Card
(pre-installed)

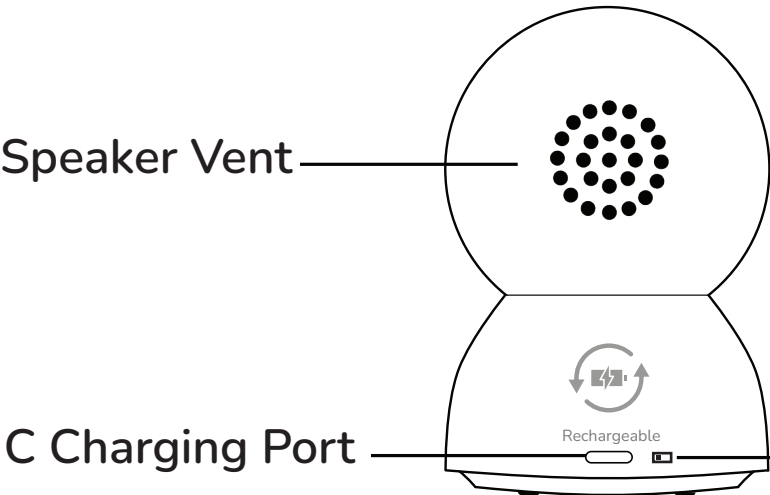

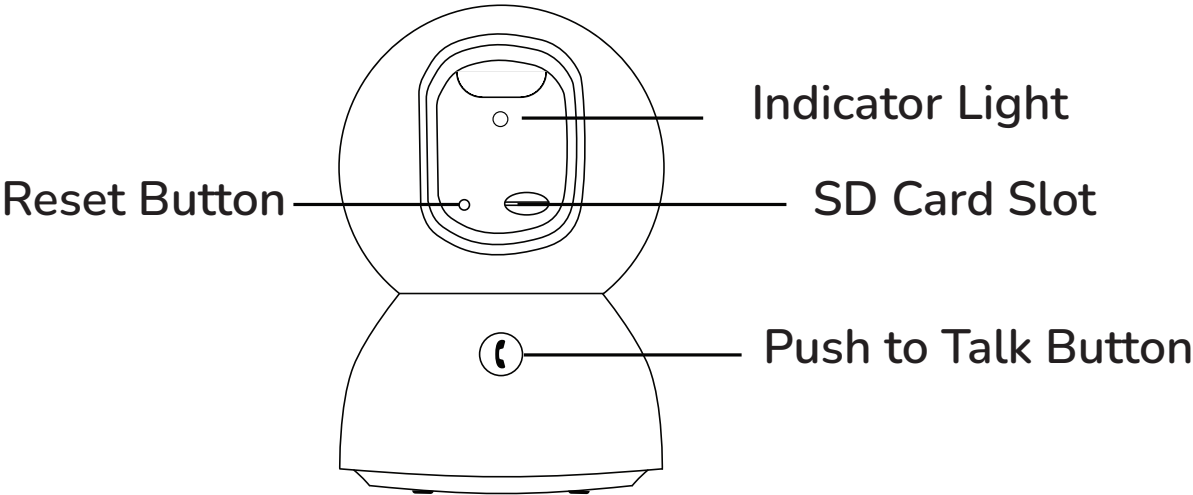

Mounting Bracket
(optional)

Camera Layout

Push camera up to reveal SD card slot and reset button

Toggle Off / On Switch

Indicator Color	Camera Status
Fast Blue Flash	Pairing and Errors
Solid Blue	Device is On
Slow Blue Flash	Firmware Update in Progress
Flashing Blue	Device is Connecting to Wi-Fi
Red Light	Low Battery Warning

Charge Your Camera

1. Plug in the Battery Camera

Use the included USB-C charging cable to connect the camera to a power source.

2. Watch the LED Light

Indicator Color	Camera Status
Red Light	Device is Charging

3. Charging Time

A full charge takes approximately 4-6 hours using the included USB Cable. The camera also works with a solar panel of at least 8 watts if you have one (not included). For reference, a standard wall outlet typically provides enough power, but a laptop, or USB port alone might not. We recommend plugging the included cord into a wall adapter for the best performance.

Quick Setup Steps

1.Download the App

Find and install the Sensforge app from the App Store or Google Play.

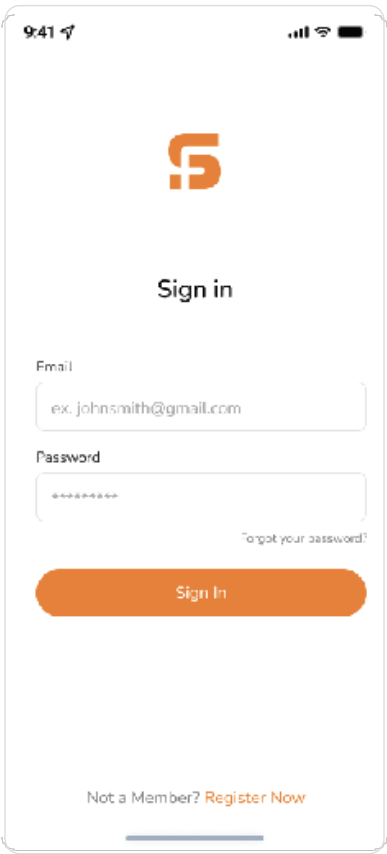

Or

 Sensforge

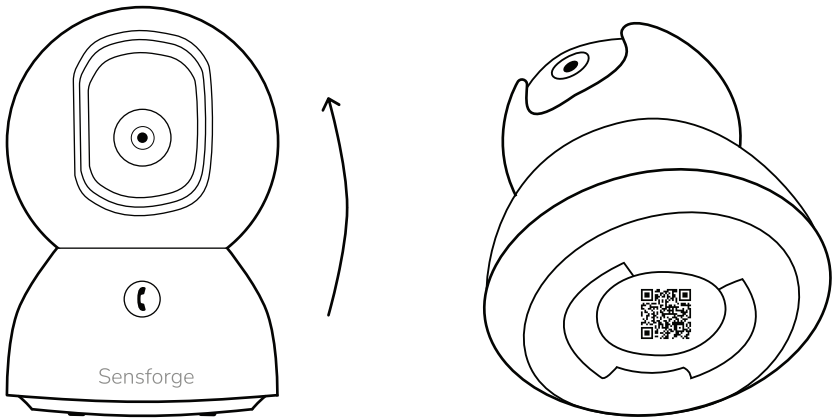

2. Create an Account or Sign In

Open the app, then login or create a new account to get started.

3. Add the Camera to the App

Find the QR code under the camera on the feet. Follow the on-screen prompts to scan the QR code with the app.

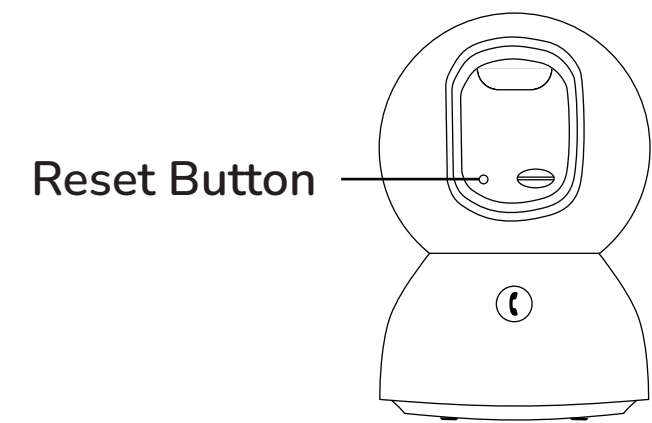

Flip the camera over to reveal the QR code at the bottom.

Quick Setup Steps

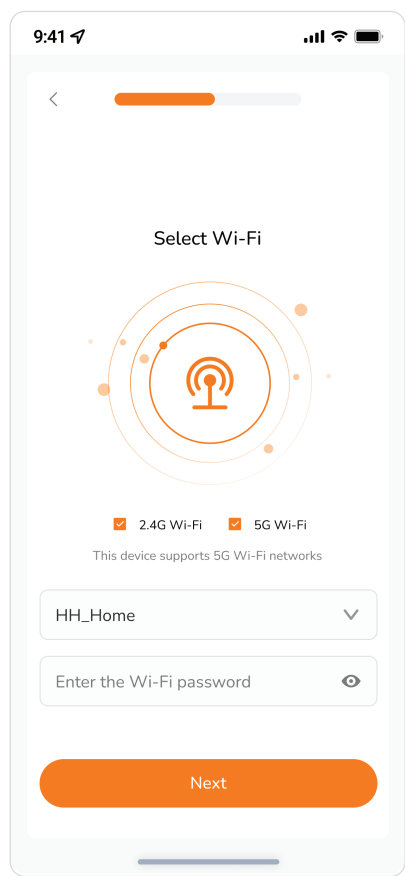

4. Pair the Camera

Plug in the camera, tilt the lens upward to expose the reset button, and press and hold it for 10-15 seconds until the indicator light flashes. This signals the camera is ready to connect.

5. Connect to Wi-Fi

Select your home Wi-Fi network (2.4 Ghz or 5 Ghz) in the app and enter your Wi-Fi password to link the camera.

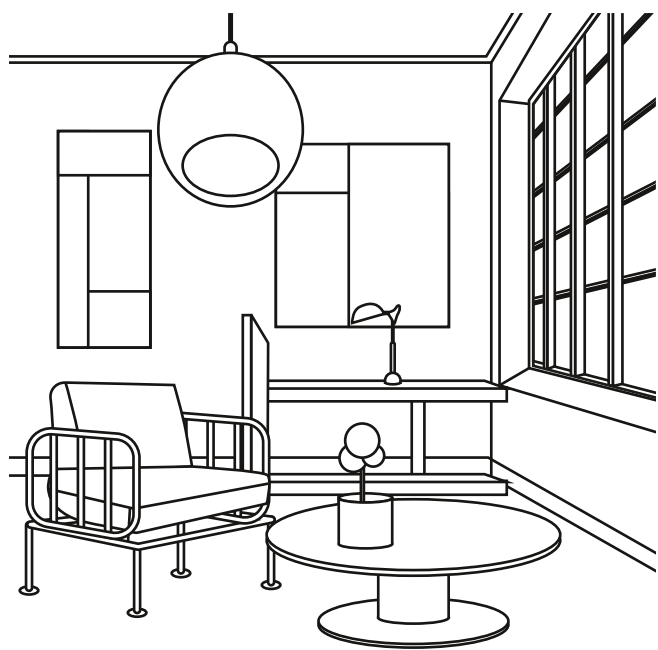

6. Complete Setup

Once the connection is established, name your camera and customize your settings for optimal use.

Tabletop Setup Instructions

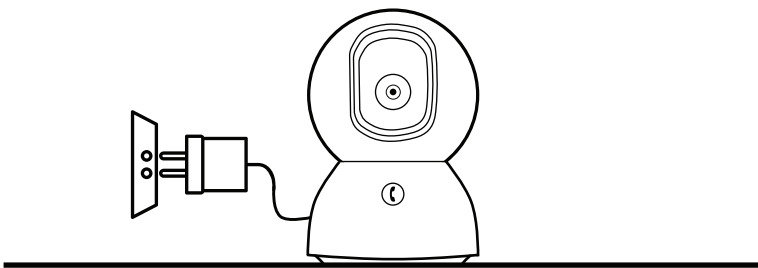

1.Choose the Perfect Spot

Select a flat, stable surface with a clear view of the area you want to monitor. Ensure the spot is near a power outlet and within range of your Wi-Fi signal for uninterrupted performance.

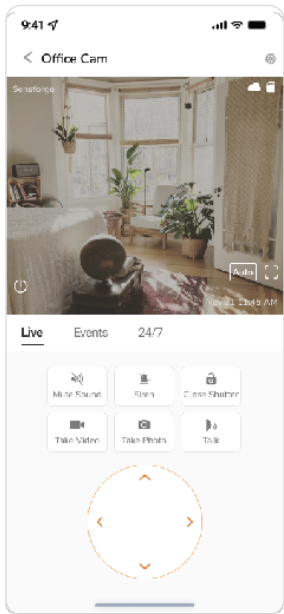

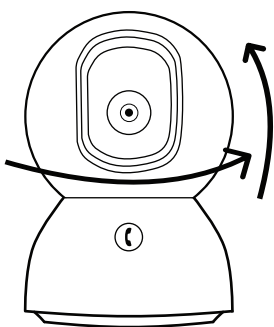

2. Prepare the Camera

Remove any protective coverings and attach the power cable to the camera. Plug the other end of the cable into a nearby power outlet.

3. Adjust the Camera Angle

Using the mobile app, adjust the camera's pan and tilt to focus on the desired area.

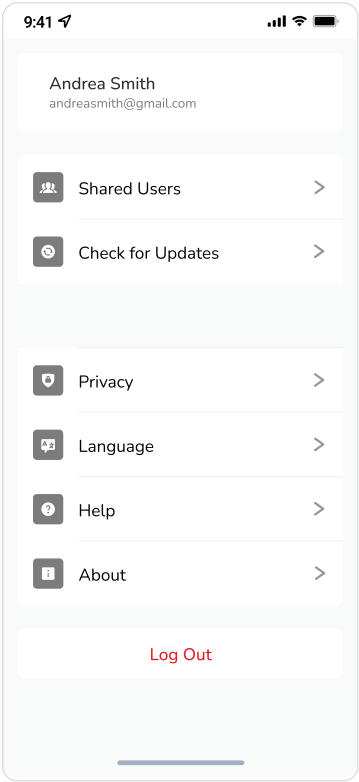

Customer Support

For further assistance, consult the FAQs or submit a support ticket through the app: Profile icon > Help > FAQ or Tech Support.

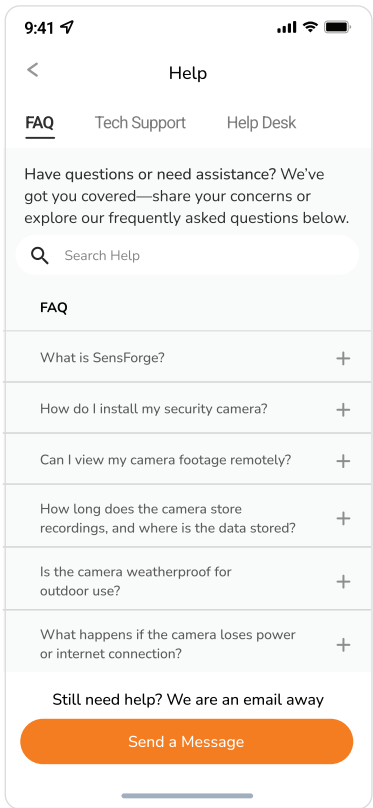

1. Open the App Profile Settings

From the homepage, tap the Profile icon to access your settings.

2. Access the Help Section

In the settings menu, tap on the Help option. Here, you’ll find various resources to assist you with any issues or questions regarding your security camera.

Frequently Asked Questions

How does AI tracking work?

The camera automatically detects and follows movement using AI-powered tracking. By intelligently recognizing humans, pets, and more, the star of the show is always in focus. You can also sort recorded footage in the Sensforge app by detection type, making it easy to review only what matters most. The tracking and detection capabilities can be turned on and off in the Smart Detection Settings.

Does the camera work at night?

Yes! Color and infrared night vision ensure clear footage even in complete darkness. Black and white or color night vision can be selected in the App.

What storage options are available?

Save footage with your included microSD card (up to 256GB) or opt for cloud storage with a subscription. Cloud comes free for a limited time.

Can I turn the camera off for privacy?

Yes! The camera includes a physical privacy shutter. Activate it in the Sensforge App whenever you don't want the camera to record.

How do I receive alerts?

Stay informed with real-time detection alerts sent straight to your phone through the Sensforge app—plus, you can fully customize your notifications by selecting specific zones, like getting alerts for your driveway while ignoring activity on the street. You can be notified based on specific detection types, zones, and times. You can also turn on/off notifications completely in the app and in your phone settings.

What AI functions are included?

We offer Motion, Human, and Pet AI detection for free.

How long will the camera hold a charge?

The Sensforge Pan-Tilt Indoor Camera plugs into a normal outlet, giving you a 24/7 charge.

Can my Sensforge camera record continuously, or only when acitivity is detected?

Yes! You have two recording options: 24/7 continuous recording or event-based recording. With continuous recording, your camera captures everything around the clock (requires your included microSD card or cloud storage plan). If you prefer to save space, event-based recording automatically records only when motion is detected, allowing you to review and delete clips individually—so you keep only what matters. You can manage these settings in the Sensforge app.

Features	Details
24/7 Recording	Free
AI Identification	Free
SD Card	Pre-installed
Wi-Fi	Dual-band (2.4/5GHz)
App Calling	Two-way Call
Audio	Can talk at the same time
Motion Zone	Customizable
Color or black and white	In color
Privacy Shutter	Included

Have Another Question?

Support@sensforge.com

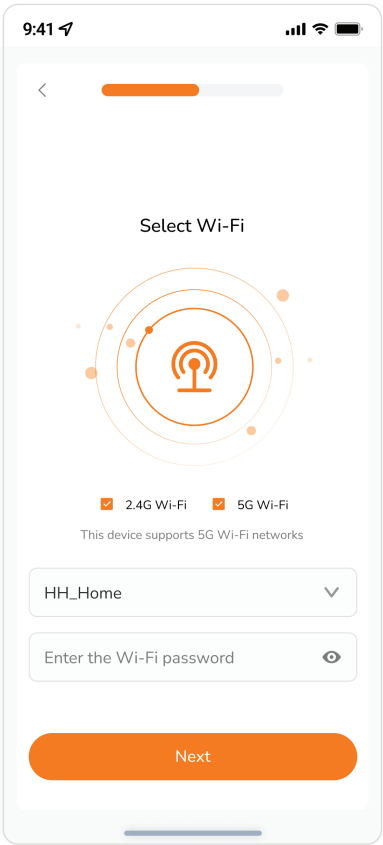

Submit a Ticket on the App

Basic Troubleshooting

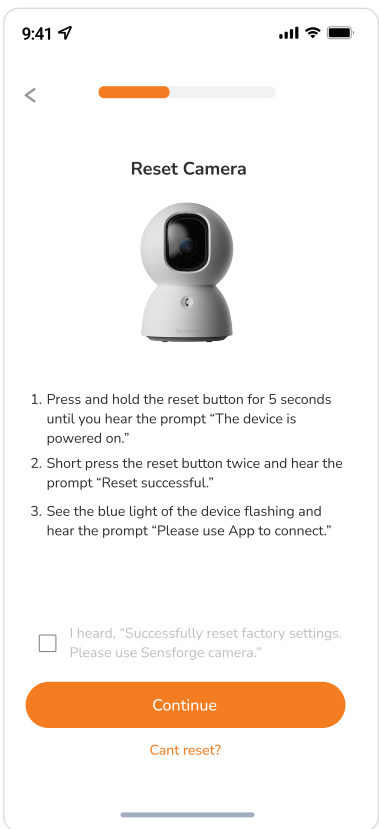

Wi-Fi Connection Issues

Ensure your router is powered on and within range of the camera.

App Not Pairing

Restart the camera and ensure the correct Wi-Fi password is entered.

Basic Troubleshooting

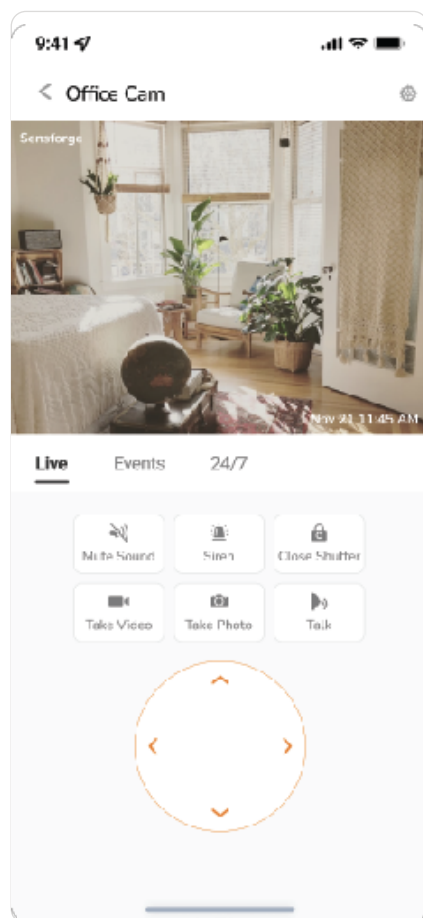

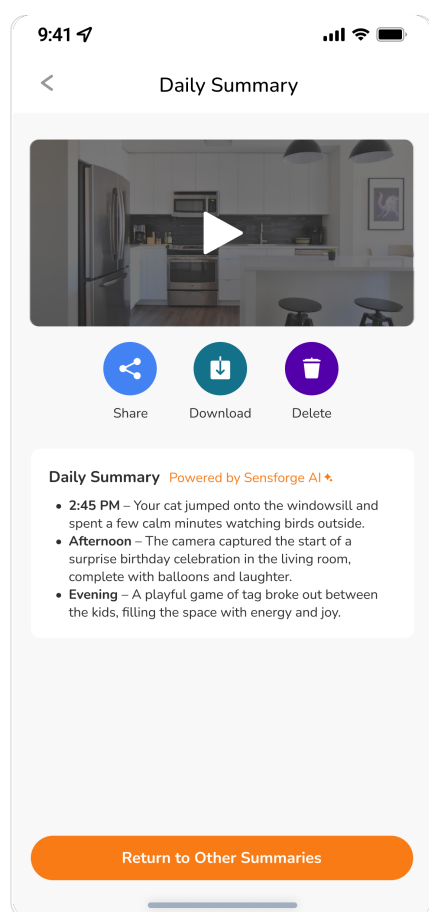

No Video Feed

Check that the privacy shutter isn't activated, and that the camera is on (power button in the app). Next, check that the camera is plugged in and has a good charge (battery icon in the app). From there, ensure that no objects are obstructing the lens and that you have tapped the live feed window from the home page.

If there is still no live feed, look at the Events and Recordings tabs to see when the last recording was. If it has been a while, the camera has likely lost connection. Unplug the camera, wait a few seconds, and then plug it back in.

Rotation Issue

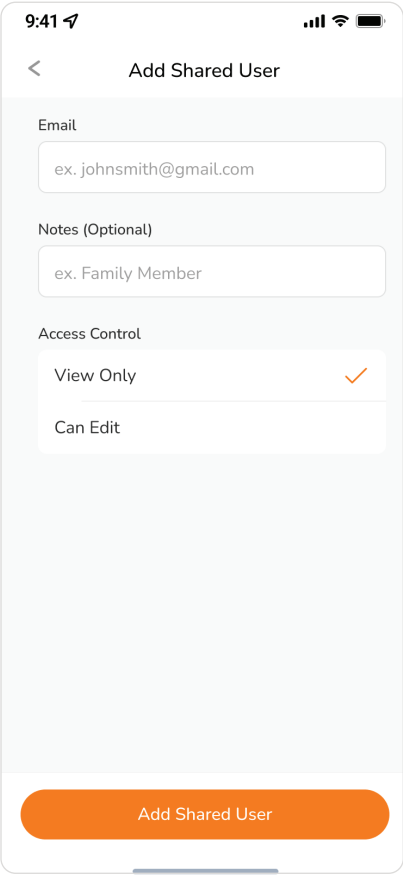

Use Calibration in the Camera Image setting. If video flipping needed, use Flip Image in Camera Image setting. Moving with the app arrows also rotates the camera head.

Basic Troubleshooting

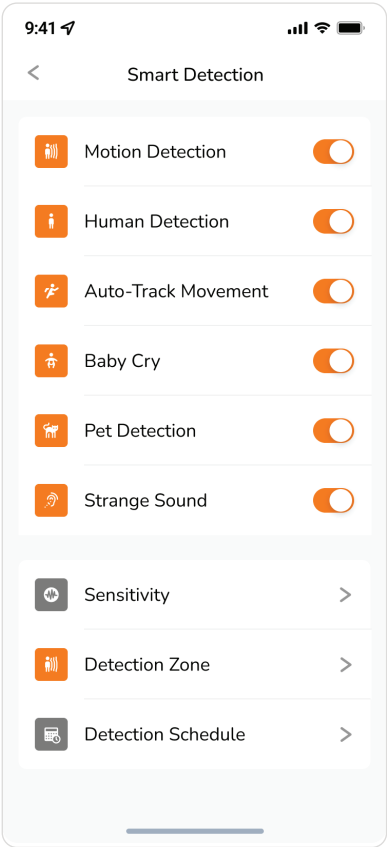

Adding Shared Users

To allow viewing access for loved ones, add shared users within the Profile settings

Motion Not Detected

Check your Smart Detection settings, adjusting Sensitivity, Detection Type, Zone, and Schedule as needed.

FCC Statements

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Information

Please note that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: this equipment has been tested and found to comply with the limits for a class B digital device, pursuant to the part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation, if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician to help.

To maintain compliance with the FCC's RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.

Use only the supplied antenna.

FCC Conditions

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Warranty Compliance

We are committed to delivering high-quality products that meet your expectations and provide reliable performance for years to come. To ensure customer satisfaction and peace of mind, this product is covered by a comprehensive one-year limited warranty. The terms and conditions of this warranty are designed to protect your investment while ensuring compliance with all relevant regulations and industry standards.

Warranty Coverage

The one-year limited warranty guarantees that the product is free from defects in materials and workmanship under normal use during the warranty period. If the device fails due to manufacturing defects or functional issues, we will repair or replace it at no additional cost to you, subject to the terms outlined in the warranty policy. This includes coverage for the internal components, casing, and any included accessories, provided they are used in accordance with the instructions in the manual.

Warranty Eligibility

To remain eligible for warranty coverage, you must adhere to the proper use and maintenance guidelines outlined in the user manual. Any unauthorized modifications, repairs, or improper handling may void the warranty. Additionally, warranty claims must be accompanied by proof of purchase, such as a receipt or invoice, which verifies the product's purchase date and authenticity.

Extended Warranty Options

For added peace of mind, we offer optional extended warranty plans to provide additional coverage beyond the standard one-year warranty period. These plans include enhanced services such as expedited repairs, accidental damage protection, and extended technical support.

Support and Documentation

For complete details about the warranty terms and conditions, including exclusions and coverage limits, please refer to the warranty section on our product page. If you have questions or need clarification, our dedicated support team is available to assist. We are proud to stand behind our products and are committed to resolving any issues promptly and professionally. Your satisfaction is our priority, and we are here to ensure your product operates reliably throughout its lifespan.

Company Statement

(1) We have tried our best to ensure the completeness and accuracy of the materials. If you have any questions or disputes, we reserve the rights to provide clarification or interpretation.

(2) We will update the content promptly based on product functionality and regularly modify the products or programs described in this information. Updates will be included in the new version without prior notification.

(3) The content of this material is for customer reference only. There is no guarantee that it is exactly the same as the product. Please refer to the actual product for accurate information.

(4) The camera parts shown in this instruction are for illustration purposes only and do not represent the purchased configuration.

Operating conditions:

Temperature: -10° to 45°C (14° to 113°F)

Humidity: 95% or less (non-condensing)
