

MPE ESTIMATION
FCC ID: 2BNF8-HT08

1. Limit for General Population/Uncontrolled Exposures

Frequency	Power Density(mW/cm2)	Averaging Time(minutes)
300MHz-1.5GHz	F/1500	30
1.5GHz-100GHz	1.0	30

Note: F= Frequency in MHz

2. Estimation Result

Frequency (MHz)	EIRP(dBm)	Max Tune Up Power (mW)	MPE (mW/cm ²)	Power Density (mW/cm2) Limit	Result
410.025	32.97	1981.527	0.062866	0.273	PASS
$Pd = \frac{P_{out} * G}{4\pi r^2}$					
Note: The estimation distance is 76cm.					
Note: Reading result see the test report GTSL2025020128
