Attn: Director of Certification

Family Certification request letter - FCC

FCC ID: 2BNMP-PPRU880X
HVINS / Model numbers: pRRU8801, pRRU8802
PMNs / Model names: Native DAS Solution

We, AmpliTech Group, hereby request certification for a product family under a single application and FCC ID. The base model and its variants share the same core design and technical characteristics, with only minor differences that do not affect compliance with FCC requirements.

Details of the product family are as follows:

Base Model: pRRU8801
Variant Models: pRRU8802

Justification:

All models listed above are electrically and mechanically identical, with variations limited to antenna configuration: model pRRU8801 contains built-in internal antennas, model pRRU8802 has external antenna connectors. These differences do not impact RF performance or compliance with applicable regulations. The test results obtained for base model within this family can be applied to all other model variants, considering their similarities

We respectfully request that these models be certified under a single application to streamline the approval process and ensure consistent regulatory compliance.

Should you require any additional information or documentation, please do not hesitate to contact us.
