G BAND

Information to User

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Important

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The uses of equipment generates and radiates radio frequency energy, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

COMMON PROBLEM

How to do when it cannot connect with Wireless? (low speed/ failed to connect or reconnect)

Please confirm whether your device is IOS9.0, Android 5.0 or above.

It takes time differently for each connection caused by the signal interference of wireless connection. If it fails to connect for a long time, please confirm that you use it in environment without magnetic field or interference of multiple Wireless device .
Turn on again after turning off the Wireless.
Turn off the background applications of mobile phones or restart your mobile phones.
Please don't make your mobile phones connect with other Wireless device or functions at the same time.
Please check whether the APP is operated normally in the background. Otherwise, it may fail to connect.
