Magnetic Ring Guideline

For Non-MagSafe Case: use magnetic ring for better charging experience.

For MagSafe Case: please kindly skip this page.

Key Steps

- 1 Identify Your Phone Model
- 2 Align Position as Shown
- 3 Stick the Magnetic Ring

Customer Support

Dear Customer,

Thank you for your purchase!

We deeply value your support and strive to prioritize your needs. Our commitment to quality is ever-evolving, and we embrace customer needs as opportunities for improvement.

If you encounter any issues, please don't hesitate to contact us:
cs@elexware.com

We are here to listen to your concerns and gladly assist with refunds or replacements to ensure your good shopping experience.

We truly appreciate your business and hope you enjoy our products and services!

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
