

SOS Rechargeable Personal Safety Alarm

Thank you for purchasing your personal safety alarm. Our vision is to help make our communities safer for women and children.

When to Use It

This device is designed for emergency situations where you feel unsafe and want to alert people around you for help or scare off attackers.

1. When you suspect you are being followed while walking alone.
2. If you notice a potentially unsafe situation nearby, such as a suspicious person approaching children, and want to draw attention to scare off the attacker.
3. When you need immediate assistance, but cannot call for help with your voice.

How to Use the Alarm

1. Pull out the top ring to activate the device. It will emit a loud 130 dB alarm. The alarm will continue until it is turned off manually. The built-in light will also flash to help attract more attention. The alarm can last up to 90 minutes on a full charge.
2. Press the side button to turn on the flashlight. Press again to activate the strobe light. Press a third time to turn off the light. The light will automatically turn off after 3 minutes.

How to Use the SOS Function

1. Go to your phone settings, set up an emergency contact, enable all SOS options, and turn on Bluetooth.
2. Long press the side button on the device. The device will beep ("di"), indicating it is discoverable. Find "SOS Personal Alarm" in your phone's Bluetooth list and connect.
3. When you pull out the top ring, the device will emit a 130 dB alarm. If it lasts for more than 5 seconds, your phone will automatically call the police and send a location-based message to your emergency contact (this feature depends on your local network and phone model). It works the same as pressing your phone's side button five times rapidly.
4. Silent SOS trigger: Press the side button on the device five times rapidly to activate SOS without sound.
5. Turn off the SOS function: Press 3 times and hold the button on the 3rd press (until you hear beeps "di-di").

Charging Method: Type-C USB
Charging time: within 1 hour
Battery capacity: 200mAh/3.7V

Made in China

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
