PowerPack Slim 3

Ultra Slim Magnetic Power Bank

Welcome to your PowerPack Slim 3

Let us help you set up your new charger quickly with this guide.

What's Included

- PowerPack Slim 3

Wireless Charging

1. Start by using a Qi enabled device, also ensuring it is MagSafe compatible or that you are using our SnapMag case or SnapMag Ring.
2. Place the PowerPack Slim with the inside circle facing the back of your device; it should 'snap' into position.
3. Press the power button once, the LED indicator will appear and charging will begin immediately. Double press to power off.

Direct Charging

- 1.Ensure your device supports USB-C charging.
2. Pull out the built-in USB-C cable from the bottom of the PowerPack Slim, connect it to your device, and charging will begin automatically.

Warranty & Safety
All SnapWireless products are protected and covered against product defects in materials, workmanship and faults for a period of one (1) years from the date of original purchase, when purchased through our online store or an authorised reseller. Changes or modifications not expressly approved could cause damage to the product and may void the user warranty.

FCC Warning
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
