

WG-06 Air purifier

Thank you for purchasing our company's products
Please read the user manual carefully before use
Please keep the instruction manual properly

Product parameters:

Product Name: Air Purifier

Product model: WG-06

Product material: ABS/pp/filter element/circuit board

Voltage used: d.c5v

Current usage: 2A

Product size: 160 * 160 * 260mm

Plasma:- 4kv ± 0.5 kv

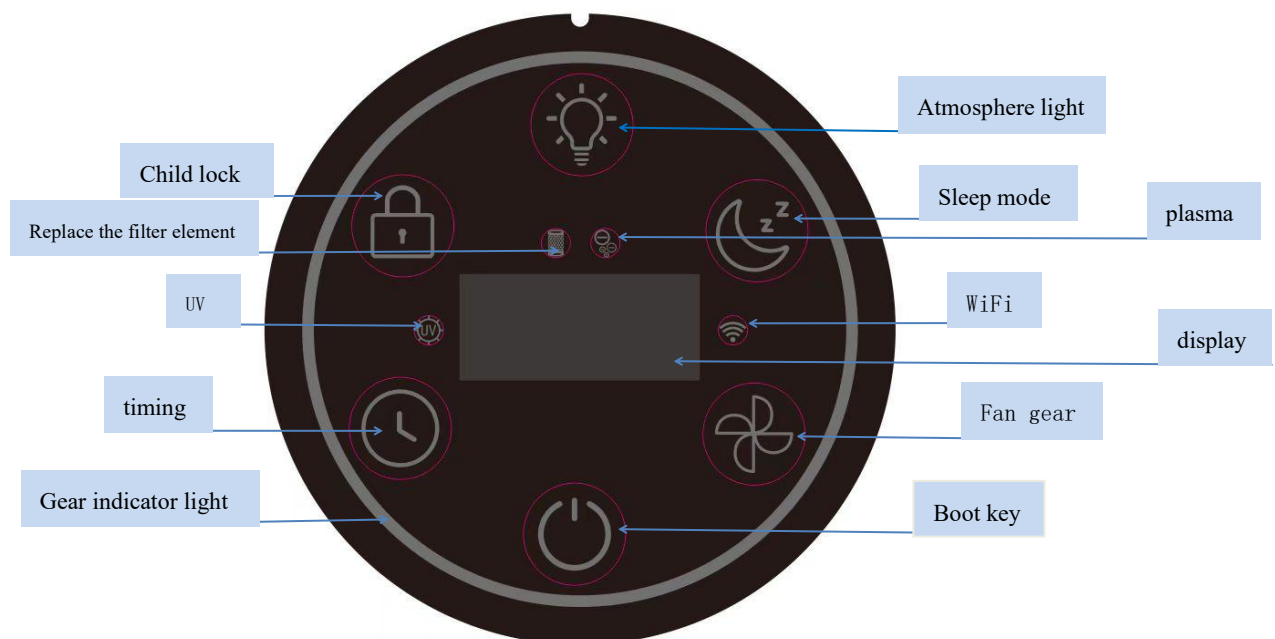

Ozone concentration:< 0.05PPM

Execution standards: GB/T18801-2008 QB/T4982-2016

Product Introduction

WG-06 air purifier is a small air purifier suitable for office and home scenarios; The product adopts a transparent design style and features cool ambient night lights; Although the product is small in size, it has large air circulation blades and strong wind power, which can effectively absorb pet hair, filter PM2.5 particles and viruses and bacteria in the air; The product has a high-precision infrared sensor that can monitor the air quality in the home in real time and display it clearly through numerical and lighting forms; Remote control can be achieved through a mobile app, allowing you to constantly monitor the air quality at home.

Introduction to Key Functions

Basic version

Display screen shows: gear, timing, filter usage time;

*Turn on the power, the power button flashes, click the power button, the machine starts up, and the default fan is in gear 1;

Precautions for air purification

It is recommended to clean the filter element of this product every two weeks and replace it every three months.

When cleaning the filter element, do not wash it with water. You can use a cloth to wipe it, or use a soft brush or toothbrush to clean the dust attached to the surface of the filter.

When cleaning the filter element, please do not knock it, otherwise it will damage the internal structure of the filter element and fail to achieve the filtering effect.

The applicable range of this product is 15-30 square meters. If the usage space is large, please use a suitable product.

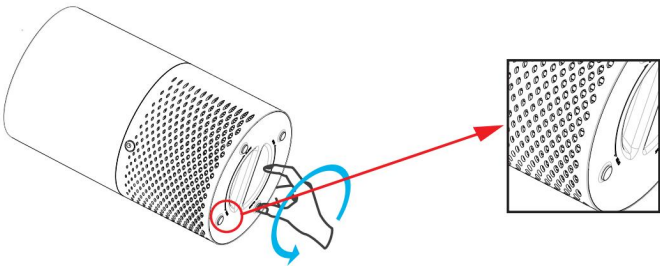

This product produces a very small amount of ozone during operation. If you feel difficulty breathing, please turn off the machine and open the window for ventilation.

6 Please do not spray essence, essential oil, perfume and other corrosive liquids on the filter screen.

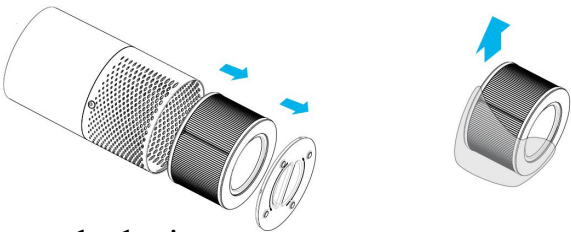

7. When the product is not used for a long time, please place it in an environment with low temperature and humidity to avoid adverse conditions that may damage the product's functionality.

Filter replacement method

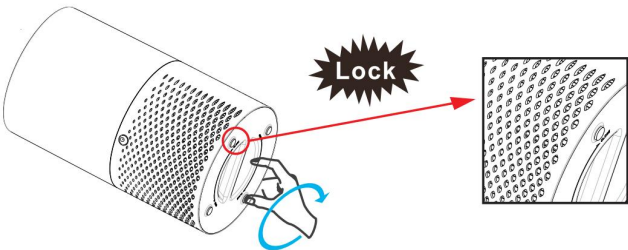

1. Rotate the bottom cover counterclockwise and open the bottom cover button

2.Remove the bottom cover and filter element, and install the new filter element into the machine

3.Cover the bottom cover and tighten clockwise

warranty card

This manual also serves as a warranty card. Within one year from the date of sale, if the product malfunctions due to quality issues caused by the manufacturer, free repairs will be provided by presenting the purchase invoice or this card to our factory or authorized repair department. Malfunctions caused by improper use by the user, or the absence of a purchase invoice or card, will still be repaired at the user's own expense.

APP connection steps

1. Scan your phone to download the app, register and log in; Alternatively, search for Graffiti Smart or Smart Life app downloads in the app store. (Both apps can be used)
2. Turn on the machine and the WiFi icon will enter slow flashing mode; (Ensure there is available WiFi).
3. Double click the child lock button, and the WiFi icon will enter a flash mode.
4. Open the Bluetooth on your phone, enter the Smart Life app, and click on "Add Device" on the homepage; The system automatically searches for devices, and once a device is found, click add.
5. Enter WiFi password to add device; Waiting for successful addition.
6. After successful addition, enter the operation background and the WiFi icon will remain on, and you can use it.
7. The WiFi network will remain unchanged in the future, and when the machine is turned on, it will automatically connect to the internet without the need to reconfigure the network.

Colorful horse racing ambient light warms you every night

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
