Declaration of Similarity

We, Kadex B.V., declare that the models listed below use the same generic:

- Schematic
- Assembly
- PCB layout
- RF module

Models:

- Personal Button BLE (neckless version), product number: 210231299
- Personal Button **no** BLE (neckless version), product number: 210231099
- Personal Bracelet BLE (bracelet version), product number: 210231299B
- Personal Bracelet **no** BLE (bracelet version), product number: 210231099B
- Personal Button Tracking Only + BLE (neckless version), product number: 210231599
- Personal Bracelet Tracking Only + BLE (bracelet version), product number: 210231599B
- Personal Bracelet Easy Touch (bracelet version), product number: 210231799B
- Personal Bracelet Easy Touch + BLE (bracelet version), product number: 210231899B

The difference between the Personal Button (BLE/ no BLE) and the Personal Bracelet (BLE/ no BLE) is the plastic housing and the wearing position (personal button as a neckless and the personal bracelet as a wristband). The difference between the BLE/ no BLE variants is that for no BLE variants the BLE is switched of via the Kadex Pro Server application or during the software flashing of the production flow. The tracking only variants have no push button but a closed plastic housing. The easy touch variants have a larger push button to make pushing the push button easier.

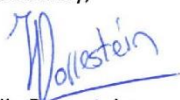

Public

Besides above, there are 5 different color options for all variants. The color options are:

- 00: White
- 01: Blue
- 02: Green
- 03: Pink
- 04: Grey

These color variants are included after the product number in this format: "-**", e.g. "-01" for blue.

Sincerely,

Jip Dorrestein
Managing Director
Kadex B.V.
