

1 Label design

Below a description is made of the label that will be placed on the Kadex Reed Sensor Long. The FCC and ISCED product IDs are laser printed on the plastic housing of the design.

1.1 Label overview

Below are the outlines of the label on the Reed Sensor Long.

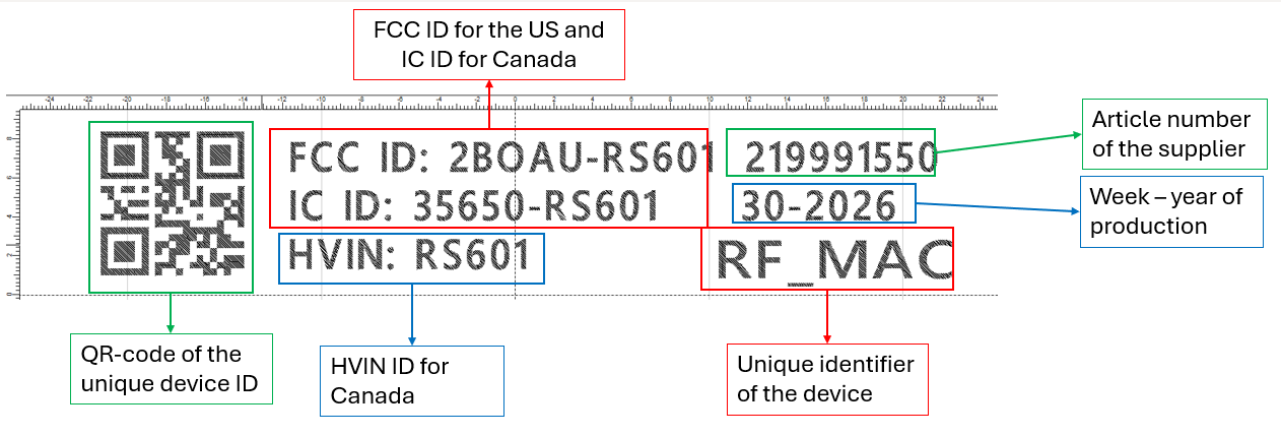

Below is a picture as an example of the label on the Reed Sensor Long.

1.2 Label items explained

See below for the explanation of all items on the label on the Reed Sensor Long.

1.3 Label placing on product

Below you can see the location of the label on the Reed Sensor Long.

The first picture is from the top with an arrow to the location of the label. The second picture contains the label. This label is upside down to make it easier to read when placed in the most common way.
