Lights ON/OFF

Mode selection

Choose a rhythm mode based on the type of music.

Mode selection, from left to right : select color mode/music rhythm mode/automatic mode /DIY mode/timing mode. Note: There is no DIY mode for group control.

Phone MIC

DO NOT select these when in group control mode.

Special note: In group control mode, please select Device MIC.

Why can't I choose PHONE MIC or MUSIC? Because choosing this will cause the light to stop, because the sound will first receive the sound signal through the MIC of the mobile phone, and then send the command to the control board of the device through the Bluetooth of the mobile phone. During the group control, the chip cannot handle too many voice commands, resulting in the light to stop, and you have to turn off the power and restart the device.

But if you control only one device, you can choose any of them.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
