

**Products**

Visible Nose Hair Trimmer is a personal care tool that combines HD camera, LED lighting and smart trimming. By observing the details inside the nose in real time through the built-in display, it helps users trim unwanted nose hairs accurately and safely, saying goodbye to the traditional blind trimming trouble.

**Product Features**

- **High Definition Visual System**  
Real-time mobile phone transmission + 500W HD camera for real-time display of the inside of the nose
- **Dual-action security**  
360° rotating curved head + stainless steel mesh, zero pulling and more peace of mind.
- **Intelligent light replenishment design**  
6 LED soft lights for clear visibility in low light conditions
- **Type-C fast charging**  
1.5 hours to fill up, lasts about 45 minutes
- **IPX5 waterproof**  
Washable cutter head for easy cleaning

**Product Accessories**

Main unit※1      Data cable※1  
Instruction manual※1      Cleaning Brush※1

**Usage**

**Step 1: Boot preparation**

① Press the power button for 1 second to start the lens power,  
② Press the power button again for 1 second to switch the motor mode  
③ Press and hold the power button for two seconds to switch off the power

**Step 2: Trimming operations**

① Insert the tip of the blade gently into the nostril (not more than 1cm)  
② Observe the position of the nose hairs through the mobile phone APP, and slowly Rotate the body to trim, recommended to operate in sections for several times.

**Step 3: Cleaning and maintenance**

① Switch off the power, use the brush to clean the residual hairs of the cutter head,  
② The cutter head can be disassembled and washed (do not soak the main unit).

**Caveat**

- ▲ Fully charged before first use
- ▲ Keep the device vertical when trimming, avoid sideways force,
- ▲ Recommended to trim every 2-3 weeks, do not over-trimming
- ▲ Discontinue use immediately if redness or swelling occurs.
- ▲ Do not share the blade with others to prevent cross-contamination.

Note: The cutter head is a precision part please do not break or bend it by hand; such behavior will lead to the normal operation of the nose hair clippers!

**Common problems**

Q1: Can I use it while charging?  
A: Doesn't support use while charging, need to disconnect the power supply when fully charged

Q2: How to deal with blurred camera?  
A: Wipe the lens lightly with a fine cotton swab.

Q3: What should I do if the cutter head becomes dull?  
A: It is recommended to replace the special tip every 6 months.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
