1. Safety precautions

In order to avoid possible damage to you, others or any property, please make sure to pay attention to the following safety precautions

If the machine power line is out of order, you must entrust machine manufacturer, maintenance service center or qualified technicians to replace it to keep danger away.

⚠ WARNING

Wet hand forbidden!

Do not touch power plug with wet hands or else may cause electric shock Please make sure to turn off the power before or else may cause electric shock.

Unplug !

Cleaning machine else it may cause machine sudden running and further electric shock accident.

forbidden!

Prohibited to use beyond power or connected devices beyond specified value. Only can use 120V alternating Current (AC) power supply. Overheating and fire accident may occur if you use universal socket or devices beyond Specified value.

Please insert the plug completely into the power socket before starting the air purifier, if not, it may cause electric shock and overheating , even fire accident. Do not use damaged plug or loose power socket.

forbidden!

No damage to power line and socket. Do not bind wires whenyou use this machine, it may cause electric shock, Short circuit and fire accident if you use broken wires. Any cutting and scratching, refitting, over distorting, twisting, Screwing and pulling of lines are all forbidden. Do not put any heavy product on wires and sockets.

Regularly clean power plug, If dust accumulating on power plug, the dampness will make damage to insulation part of the plug, thus causing fire accident. Pull out the power plug and then clean with dry cloth (do not use wet cloth). If the Machine will be of no use for long time, please unplug it.

Taking apart is forbidden!

Do not take apart or modify the air purifier without authorization.

forbidden!

Do not put bars or metal products nearby air outlet or opening, else it may touch the internal parts and get an Electric shock or damage

User manual

Attention

- Disconnect the air purifier from the power source before move it.
- Make sure to move the product slowly. Don't move the product by pulling on the power cord.
- Don't not move the machine while the product is working, if you need to move the machine, turn off the power.

Notice

Please turn off the power immediately in case of any of the following situations:

- Malfunction of any switch.
- Circuit breaker worked or fuse burned.
- Abnormal heating of wires or plugs
- Any burnt smell, abnormal sound or shock

Notice

forbidden!

Do not use solvent like benzene diluent etc to clean air purifier, keep the machine away from wasp spray or else air purifier may broke into damage even short circuit occurs which can lead electric shock or fire accident.

Hold the plug when you take out the power plug and do not pull wires which may cause short circuit or damage to wires to avoid fire accident and electric shock.

forbidden!

Do not use air purifier in the situation of greasy particle. For example kitchen which can reduce the service life of air purifier life.This machine should not be used as ventilating or air evacuating equipment.

Wetting forbidden!

If the air purifier works together with electric heater, the room should keep ventilation, or else there may be carbon monoxide poisoning accident. The air purifier cannot clear off carbon monoxide.

forbidden!

Do not use the air purifier in the room with fumigation type pesticides. Chemical residue could be accumulated inside the machine and then release from the outlet, marking harm to health. The room should keep ventilated thoroughly after you use insecticide and then start to use air purifier.

Keep away from flame!

Do not use air purifier in high temperature, humid conditions like bath room, as these situations may cause current leakage which can lead electric shock or fire accident.

Wetting forbidden!

Keep machine body dry or else it may cause electric shock or fire accident because of short circuit.
