Unpacking the unit

Unpacking

Remove the air purifier and accessories from the packaging box and place it on a flat surface. Remove all packaging materials, including plastic bags, foam, and cardboard, before proceeding. Inspect the air purifier for any visible damage or defects before operating it. If you notice any damage, contact customer support immediately.

⚠ Caution

- Please do not allow children to play with plastic bags to avoid suffocation hazards.
- Please do not touch the power plug with wet hands.

Operating steps

Operate in accordance with the following steps to install a clean filter and place your purifier.

1. Remove all packaging tape and gloss sheet to ensure the unit is free of debris.

2. Push the buckle of the front panel down with both hands and remove the front panel.

3. Remove the front panel.

4. Remove the filter bag.

5. Remove the activated carbon filter.

6. Remove the HEPA filter.

Lift up the filter into the air purifier

7. Ensure that the front cover closes when you push it back into place. Make sure it is securely locked in place.

8. Plug in the power cord and turn on the air purifier.

💡 Reminder

- Please do not place water inside the dust cover, which may cause damage.

Integrated air purifier, multiple functions with a wide

- Efficiently purify odors, smoke, pollen and other pollutants indoors.
- Remove pollutants.
- Kill bacteria.
- It adopts anti-bacterial design.
- Timing setting.
- Child lock protection mode.
- Real-time display of filter status.
- PM2.5 temperature and humidity indicator.

Unique 4-Stage Purification Technology

Pre-purification net	Large particles filter, big particles, hair, etc.
HEPA layer	Efficient removal of particulate matter, such as fine smoke, dust mites
Activated carbon layer	High-quality activated carbon, multi-layer, special air purification technology, to effectively remove formaldehyde, benzene, and odors

4. How to use

Function description of control panel

- Deep Indoor Indicator light
- PM2.5 Indicator Display
- Child Lock Function Indicator light

Clean the air purifier

Air purifier cleaning

After the power is turned off, the air purifier will automatically enter the standby state. At this time, the indicator light on the control panel will turn off, and the air purifier will stop working. Please unplug the power cord from the power outlet to ensure that the air purifier is completely powered off. Please wipe the surface of the air purifier with a soft, dry cloth to remove dust and dirt. Please do not use water or cleaning agents to avoid damaging the electronic components. Please clean the air inlet and outlet regularly to ensure that they are not blocked. Please clean the air purifier at least once a month, or more frequently if it is used in a dusty environment. Please check the filter regularly and replace it when it is dirty or damaged. Please refer to the user manual for the specific replacement method. Please do not use the air purifier in a humid environment to avoid damaging the electronic components. Please store the air purifier in a dry and well-ventilated place to avoid moisture and mold growth.

Quantity indicator

Green	70 - 100
Orange	30 - 69
Red	1-29

⚠ Caution

- Please turn off and unplug the air purifier before cleaning.

Air volume setting

Wind speed key

Press the wind speed key to switch between Sleep, Level 1, Level 2, Level 3, Level 4, Level 5, Turbo, Silent, and Level Switching.

Timing setting

Timing key

Press the timing key to switch between 1H, 2H, 4H, 8H, and Off. The default is Off.

Child lock function

Lock key

After the machine is working normally, press and hold the lock key for 3 seconds to enter the child lock mode. At this time, the lock indicator will be on. Press and hold the lock key for 3 seconds to exit the child lock mode. The lock indicator will be off.

Sleep setting

Sleep key

Press the sleep key to enter the sleep mode. In this mode, the fan will run at a low speed, and the display will be dimmed. The sleep mode will automatically exit after 8 hours. You can also press the sleep key again to exit the sleep mode manually. The default is off.

Filter reset function

Filter reset key

The filter reset light will be on after the machine has been in service and the air filter needs to be replaced. Press and hold the filter reset key for 3 seconds to reset the filter life. After the reset is successful, the filter reset light will turn off, indicating that the filter has been successfully reset.

Temperature and Humidity Display

After turning on the air purification system, it automatically detects the temperature and humidity of the surrounding environment and displays the data on the control panel. The temperature is displayed in degrees Celsius (°C), and the humidity is displayed as a percentage (%). The display updates every few seconds to provide real-time information. Users can monitor the temperature and humidity levels in their environment and adjust the air purifier settings accordingly to maintain a comfortable and healthy indoor environment.

PM2.5 Display

After turning on the air purification system, it automatically detects the PM2.5 concentration in the surrounding environment and displays the data on the control panel. The PM2.5 value is displayed in micrograms per cubic meter (µg/m³). The display updates every few seconds to provide real-time information. Users can monitor the PM2.5 levels in their environment and adjust the air purifier settings accordingly to maintain a healthy indoor environment. The air purifier can effectively remove PM2.5 particles from the air, providing cleaner and healthier air for users to breathe.

Wi-Fi function

In the control interface, you can find the Wi-Fi setting option. Select your home Wi-Fi network and enter the password to connect the air purifier to the network. Once connected, you can control the air purifier remotely using a smartphone app or a web interface. You can adjust the fan speed, set timers, and monitor the air quality in real-time. The Wi-Fi function also allows you to receive notifications and alerts when the air quality changes or when the filter needs to be replaced. Make sure your Wi-Fi network is stable and secure to ensure a reliable connection.

5. Maintenance and cleaning methods

Please wipe the air purifier with a dry cloth.
Please do not disassemble the air purifier.
Please do not use cleaning agents with high abrasiveness.
Please do not wash the air purifier with water or immerse it in water to avoid damaging the product.

The filter can not be washed

Clean the air purifier

- Make sure to unplug the power cord of the air purifier before cleaning it.
- Use a soft, dry cloth to wipe the exterior of the air purifier, including the control panel and vents.
- Avoid using any cleaning solutions or abrasive materials, as they can damage the surface of the air purifier.
- Use a soft brush or vacuum cleaner attachment to remove any dust or debris from the vents and filters.
- Be careful not to damage the filters or other components while cleaning.
- Do not immerse the air purifier in water or any other liquid.
- Allow the air purifier to dry completely before plugging it back in and turning it on.
- Regular cleaning will help maintain the performance and extend the lifespan of the air purifier.
