

Remote Control Manual for Frequency Conversion Fan Light

The fan light is pre-paired with the remote control, so no pairing is required. If the remote control does not work, please follow the steps below for pairing code.

1. Pairing code: Turn on the power and listen for a beep. Within 5 seconds, press and hold the "FAN OFF" button. The receiver will emit a beeping sound to indicate successful pairing. If pairing is unsuccessful, turn off the power, wait for 1 minute, and repeat the above steps.

Clearing code: Within 5 seconds of powering on, press and hold the " " button until you hear two beeps. This indicates the code has been successfully cleared.

If the remote control is not working effectively, please check the batteries. If not used for an extended period, remove the batteries.

precautions:

1. The receiver should be installed with the flat surface facing up to avoid affecting the fit between the COVER and the ceiling.
2. The receiver has input and output terminals. Do not reverse them.
3. If there is a wall switch for the fan, it must be turned on to allow effective control.
4. When wiring, refer to the wire color and the instructions on the sleeve for correct connections.
5. When using the remote control, check that the batteries are installed correctly (pay attention to the polarity). The indicator light will flash each time a button is pressed.

6. The antenna must be exposed to the outside of the lamp during installation.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation
