

Car mounted wireless magnetizing bracket

MD03

EN Indicator Light Guide

Charger Status	Plugged In	Standby	Charging/ Fully Charged	Error Detected
Indicator Light	ON	ON	OFF	Flashing

- If an error is detected:
1. Check that your phone supports wireless charging and does not have any credit cards, stands, or other metal attachments on the back (other than the magnetic ring).
 2. After checking the above, unplug and plug in the charging cable again to resume normal charging.

ⓘ Important Reminders

1. This charger supports an input of 9V=2A and outputs a maximum of 15W.
2. Only use the cable provided with the charger. An Apple cable or other third-party cable may interfere with charging.
3. This charger requires a charging adapter that supports QC or PD fast charging and an output of at least 18W.
4. Charger must be plugged in to power supply to charge devices.

⚠ Safety Warnings

1. Do not place the device in temperatures below 0° C (32° F) or above 60° C (140° F).
2. Do not attempt to disassemble the device, expose it to an open flame, or submerge it in water to avoid damaging the device.
3. Always check for damage to the device, cables, or other accessories before using the device. If damaged, do not use the device.
4. Do not attempt to disassemble or modify the device in any way, as it may cause serious damage and void the warranty.
5. Do not expose the device to extremely hot, humid, or corrosive environments to avoid damaging the device.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
