

Manual (Read this manual carefully before use and keep it properly) 	Essential parameter Product dimensions: 115*120*115 Total product weight: approximately 455g Battery capacity: 2000mAh Battery type: Rechargeable lithium battery Input voltage: 5V Charging port: Type-C Bluetooth version: Bluetooth V5.4 Supported Bluetooth protocols: A2DP1.3, AVCTP1.4, AVDTP1.3, AVRCP1.6, HFP1.8, SPP1.2, S-MFP, and L2CAPS.3 Wireless transmission range: ≥ 10m Rated voltage: 3.7V Bath specifications: ø50±0.3 mm Rated power: 40.2W Bluetooth operating frequency: 2.402GHz-2.480GHz Connection method: Bluetooth/Bluetooth network sharing	Accessories 1. Host XI 2. Charging cable XI 3. Instruction Manual XI 4. Plugging the XI 5. flower pot tray XI Method of operation : On first startup, the device automatically enters Bluetooth pairing mode. Search for "YI Call" in connected devices, select, and connect. For Android users: manually enable Bluetooth network sharing in Personal Hotspot settings. For iOS users: enable Allow others to join in Personal Hotspot settings. Network sharing is now complete. 1. If the audio is already paired, it will automatically reconnect to the last device. If it fails to reconnect within 5 seconds, the system will enter pairing mode and you need to reconnect. 2. M key: (1) Hold down for 3 seconds to power on or off. (2) Double-click to toggle between interfaces: the music, AI, settings, and clock interface route in sequence. (3) Short press to play/pause the music interface. (4) Short press to confirm, double click to return. 3. "+" key: (1) Click "+" to increase volume, click "-" to decrease volume. (2) Hold the "+" key for 3 seconds to turn off the color lights, then hold the "+" key for 3 seconds to turn them on. (3) In the music interface, double-click the "+" key to skip to the next track, and double-click the "-" key to skip to the previous one. (4) In the interface settings, click the "+" key to select downward and the "-" key to select upward. 4. AI key: (1) Turn on personal hotspot on your phone. Short press to activate AI, start AI Q&A, and interrupt the conversation by short pressing to restart the Q&A. (2) Personal hotspot is not enabled on the phone. Short press to enter the AI homepage, then short press again to enter the connection prompt page, and short press once more to initiate the connection. (3) Switching between AI Deep Thinking Mode and Non-Deep Thinking Mode (Personal Hotspot on Mobile): Press the "AI" key to activate AI. While on hold, press the "AI" key twice to switch to Deep Thinking Mode. After successful switching, press the "AI" key twice again to return to Non-Deep Thinking Mode. 5. AI Interaction: Enjoy entertainment anytime with audiobooks, e-readers, and stories. For schedule management, set alarms, reminders, and reminders through voice commands. Quick information access includes weather queries, expense conversations, stock queries, and license plate restrictions. Additionally, features like idiom chain games, English learning, encyclopedia Q&A, and emotional companionship make it a fully-fledged AI assistant. 6. Emotion Interaction: The screen displays different expressions when you touch the plant. It responds to each interaction by smiling, thinking, and more. Planting in a pot Soil cultivation 1. Ensure the pot interior is clean and free of clogged drainage holes (to prevent waterlogging that may cause root rot). 2. Carefully remove the plant from its original pot without damaging its root system. 3. Place the plant in the pot and add suitable nutrient-rich soil to ensure stable root development, with the soil surface about 1 cm above the pot's rim. 4. Place potted materials like pebbles on the soil surface and clean the exterior of the flower pot. Soilless cultivation: Fill the pot with clean ceramic pebbles or hydroponic media to ensure stable root discharge and aeration. Thoroughly clean the plant roots to remove residual soil and prevent bacterial growth. 1. In soilless cultivation, use accessories to block water plugs, sealing off leakage points to prevent nutrient solution from seeping out. 2. Place the plant requiring hydroponic cultivation into the container, then add nutrient solution. Note that the solution level should be approximately 1.2 cm below the pot's rim to prevent overflow or root oxygen deficiency caused by overflowing. Replace the nutrient solution periodically, preferably every 7-10 days, to maintain water purity. Many factors in the external environment may adversely affect plant growth, and we cannot fully guarantee plant health. For planting methods, please refer to relevant materials or consult qualified personnel. Common connection failure reasons 1. Bluetooth is not enabled for the connected device, and cellular/mobile data is not active. 2. Bluetooth pairing failed. Try pairing again. 3. The distance is too far or the signal is interfered. 4. The system version is too old. Update the Bluetooth version of the connected device.	Usage Safety Guidelines This product is for indoor use only. Outdoor use is prohibited. * To avoid hearing damage, keep the volume moderate and avoid listening to music at high volume for long periods, which may cause permanent hearing damage or deafness. * Please read this manual carefully and keep it properly. * Please use the manufacturer's specified accessories. * Please install according to the instructions in the manual. * This product is unsuitable for use in environments with temperatures ranging from 0 °C to 35 °C. * To reduce fire and electric shock risks, keep this product dry and avoid exposure to rain. * Please do not install and use near any heat source (such as radiators, heating appliances, stoves or other heat-generating equipment). * This product must not be placed near any open flame, such as a fire candle. * Please leave sufficient space around this product to ensure good ventilation (recommended minimum 5cm). * Do not block the opening of this product or insert objects into its ventilation ports or gaps, as this may cause fire or electric shock hazards. * Please force the plug into the port. Check that the port is not blocked, the plug and port match, and the direction is correct before connecting. * Keep accessories (e.g. sharp tools) provided for preventing accidental injuries by children out of reach of children. * The product is not a toy and must be used under adult supervision by children under 14 years of age. * Do not open or remove the casing for unauthorized repairs, as this may expose you to dangerous voltages or cause other hazards. Any damage to this product must be reported by certified technicians, including but not limited to: damaged power cord or plug, liquid spills or object drops, exposure to rain or moisture, malfunction, or physical impacts. * Before wiping or cleaning with a dry cloth, please turn off the device and unplug the power supply. * Do not use strong acids, strong alkalis, gasoline, alcohol, or other chemical solvents to wipe the product surface. If cleaning is required, use neutral solvents or water. Warning: To prevent malfunctions of this product and its connected devices, do not use adapters or other devices with output power exceeding 100W (inclusive) to power this product. Charge the product every 3 months during usage. The shortwave radio frequency signals emitted by wireless devices may interfere with the normal operation of other electronic and medical equipment. Please turn off this product in areas where its use is prohibited. Do not use this product in medical facilities, on aircraft, or gas stations, near automatic doors, fire alarm systems, or other automated control devices. Do not use this product within 20 cm of an electronic pacemaker or other medical devices, as radio waves may interfere with the normal operation of such devices.	This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter. Radiation Exposure Statement The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
